Abstract: The Emission Guidelines and Compliance Times for Small Municipal Waste Combustion Units Constructed on or Before August 30, 1999 were originally promulgated in December 1995, but were vacated by the Federal Court in March 1997. Subsequently, the Emission Guidelines were re-proposed on August 30, 1999; and promulgated on December 6, 2000. The Emission Guidelines regulate organics (dioxin/furans), metals (cadmium, lead, mercury), particulate matter, and acid gases (hydrogen chloride, sulfur dioxide, and nitrogen oxides) for small Municipal Waste Combustion (MWC) units. Small MWC units are MWC units with capacities to combust greater than 35 tons per day (tpd) and less than 250 tons per day (tpd) of municipal solid waste. The Emission Guidelines contain monitoring, reporting, and record-keeping requirements that are to be included in state plans. If a State/Local Agency does not develop, adopt, and submit an approvable State plan, then facilities in that state are subject to the Federal Plan (Federal Plan Requirements for Small Municipal Waste Combustion Units Constructed On or Before August 30, 1999 (40 CFR part 62, subpart JJJ)), adopted on January 31, 2003. The Federal Plan implements the emission guidelines in jurisdictions that have not developed an approved State Plan. These regulations do not directly apply to small MWC unit owners and operators. However, MWC unit owners and operators must comply with either the State or Federal plans to implement the emission guidelines contained in this Subpart. This ICR identifies the burden to both respondents (owners or operators of small MWC units) and the Designated Administrator (either state/local agencies or the Federal government) to implement the emission guidelines imposed by the State plans. This information is being collected to assure compliance with 40 CFR part 60, subpart BBBB.

Form Numbers: None.

Respondents/affected entities:

Owners or operators of existing small MWC units.

Respondent's obligation to respond: Mandatory (40 CFR 60, subpart BBBB).

Estimated number of respondents: 22 (total).

Frequency of response: Semiannually, annually.

Total estimated burden: Respondent burden is 86,500 hours (per year). State/

local agency burden for administering the rule is 770 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: Respondent cost is \$6,130,000 (per year). This includes \$422,000 in annualized capital/startup and/or operation & maintenance costs. State/local agency cost is \$39,000 per year.

Changes in the Estimates: There is a decrease in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens due to an adjustment in the number of respondents subject to the requirements of Subpart BBBB, which have decreased. This ICR also adjusts the burden to reflect those requirements of Subpart BBBB that are implemented under State plans or a Federal Plan, to incorporate the burden associated with the Federal Plan. The Federal Plan was finalized at 40 CFR part 62, subpart JJJ on January 31, 2003 (68 FR 5158). As of August 20, 2021, EPA data and the listing of approved State plans in the e-CFR indicates that 7 State and local agencies enforce the State plans or have requested and received delegation of enforcement of the Federal Plan. The remainder of the small MWC units will be covered by the Federal Plan, where EPA is the implementing agency. The burden on State and local agencies is included in respondent burden in this ICR, and is similar to the Agency burden in the previous ICR.

Courtney Kerwin,

Director, Regulatory Support Division.
