

of 30-day follow-up forms that are distributed to consenting participants via electronic mail using an online survey tool. At this time, CSAT is requesting approval to extend the use of these five forms as is, with no revisions. A description of each of these forms follows.

(1) Event Description Form (EDF). The EDF collects descriptive information about each of the events of the ATTC Network. This instrument asks approximately 10 questions of ATTC faculty/staff relating to the event focus and format, as well as publications to be used during the event. It allows the ATTC Network and CSAT to track the number and types of events held. There are no revisions to the form. CSAT is proposing to continue to use the form as is.

(2) Training Post Event Form. This form is distributed to training participants at the end of the training activity, and collected from them before they leave. For training events which take place over an extended period of time, this form is completed after the final session of training. The form asks approximately 30 questions of each individual that participated in the training. Training participants are asked to report demographic information, education, profession, field of study, status of certification or licensure, workplace role, employment setting,

satisfaction with the quality of the training and training materials, and to assess their level of skills in the topic area. There are no revisions to the form. CSAT is proposing to continue to use the form as is.

(3) Training Follow-up Form. The Training Follow-up form, which is administered 30-days after the event to 25% of consenting participants, asks about 25 questions. The form asks participants to report demographic information, satisfaction with the quality of the training and training materials, and to assess their level of skills in the topic area. No revisions are being made to the form. CSAT is proposing to continue to use the form as is.

(4) Meeting Post Event Form. This form is distributed to meeting participants at the end of the meeting, and collected from them before they leave. This form asks approximately 30 questions of each individual that participated in the meeting. Meeting participants are asked to report demographic information, education, profession, field of study, status of certification or licensure, workplace role, employment setting, and satisfaction with the quality of the event and event materials, and to assess their level of skills in the topic area. No revisions are being made to the form.

CSAT is proposing to continue to use the form as is.

(5) Technical Assistance (TA) Post Event form. This form is distributed to technical assistance participants at the end of the TA event. This form asks approximately 30 questions of each individual that participated in the TA event. TA participants are asked to report demographic information, education, profession, field of study, status of certification or licensure, workplace role, employment setting, and satisfaction with the quality of the event and event materials, and to assess their level of skills in the topic area. No revisions are being made to the form. CSAT is proposing to continue to use the form as is.

The information collected on the ATTC forms will assist CSAT in documenting the numbers and types of participants in ATTC events, describing the extent to which participants report improvement in their clinical competency, and which method is most effective in disseminating knowledge to various audiences. This type of information is crucial to support CSAT in complying with GPRA reporting requirements and will inform future development of knowledge dissemination activities.
