

on November 30, 2012; however, the DOL intends to seek continued approval for this collection of information for an additional three years.

The DOL, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed, revised, and continuing information collections before submitting them to the OMB. Interested parties are encouraged to provide comments to the individual listed in the **ADDRESSES** section above. Comments must be written to receive consideration, and they will be summarized and may be included in the request for OMB approval of the final ICR. The comments will also become a matter of public record.

The DOL is particularly interested in comments that:

Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

Enhance the quality, utility, and clarity of the information to be collected; and

Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

II. Introduction

The U.S. Nuclear Regulatory Commission (NRC or the Commission) is considering the issuance of an order under § 52.28 of Title 10 of the Code of Federal Regulations (10 CFR), "Transfer of Early Site Permit;" 10 CFR 50.80, "Transfer of Licenses;" and 10 CFR 50.90, "Application for Amendment of License, Construction Permit, or Early Site Permit;" approving the direct transfer of the Old Dominion Electric Cooperative's (ODEC) interest in the North Anna ESP [Early Site Permit] Site's Early Site Permit (ESP-003). The transfer would be to Virginia Electric and Power Company, doing business as Dominion Virginia Power (DVP). DVP and ODEC are currently the holders of the ESP-003. The Commission is also considering amending the permit for administrative purposes to reflect the proposed transfer.

According to an application for approval filed by DVP and ODEC, DVP would become the holder of the ESP following approval of the proposed permit transfer and would assume all rights, duties, and obligations of ESP-003.

The proposed amendment would delete references to ODEC, reflect DVP as the permit holder, and delete certain provisions that are no longer applicable because they applied only where ODEC maintained an interest in the ESP.

Pursuant to 10 CFR 52.28 and 10 CFR 50.80, no ESP, or any right thereunder, shall be transferred, directly or indirectly, through transfer of control of the ESP to any person, unless the Commission gives its consent in writing. The Commission will approve an application for the direct transfer of an ESP if the Commission determines that
