SUPPLEMENTARY INFORMATION: On behalf of the Native Village of Eyak, in accordance with the Agreement and Consent Decree in the Exxon Valdez Case (Case No. A89-095 CI [consolidated] and Case No. A92-175 CI [Ex. A]) and as mandated by the State of Alaska in the 1993, Alyeska settlement (HB 165), the BIA proposes to design and build a deep-water port and oil spill response facility at Shepard Point. The purpose of the facility is to provide, in the event of an emergency, the capability for rapid deployment of oil spill recovery equipment that could be flown into Cordova and subsequently transported by ocean-going, deep draft vessels (defined as having a draft of 25 feet) to an oil spill site in Prince William Sound. To accomplish this, the proposed construction components must address the following:

1. A heavy-duty freight dock with the dock face having a bottom elevation of minus 35' Mean Lower Level Water (MLLW); e.g., required elevation at periods of low tides.

2. A staging area sufficient for storage of oil spill recovery equipment. This is proposed to be contiguous to the dock.

3. A clear channel to the Prince William Sound with a minimum elevation of minus 35' MLLW.

4. Road access between the oil spill response dock and the Cordova Airport. As mandated, a new road segment would be constructed between Shepard Point and the existing road that serves the vicinity of the Orca Cannery.
