Phillips Plastics Corporation, Medical Molding and Assembly, Menomonie, WI; Notice of Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, as amended, an investigation was initiated on July 11, 2003, in response to a worker petition filed on behalf of workers at Plastics Corporation, Medical Molding and Assembly, Menomonie, Wisconsin.

The petitioning group of workers is covered by an earlier petition filed on June 20, 2003 (TA-W-52,107), that is the subject of an ongoing investigation for which a determination has not yet been issued. Further investigation in this case would duplicate efforts and serve no purpose; therefore the investigation under this petition has been terminated.

Signed at Washington, DC, this 23rd day of July, 2003

Elliott S. Kushner,
Certifying Officer, Division of Trade Adjustment Assistance.

Rosewood Manufacturing Company, A Division of Blauer Manufacturing Company, Inc., Charleston, MS; Notice of Revised Determination on Reconsideration

By letter of June 25, 2003, a company official requested administrative reconsideration regarding the Department's Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance, applicable to the workers of the subject firm.

The initial investigation resulted in a negative determination issued on June 13, 2003, based on the finding that imports of public safety sweaters and jackets did not contribute importantly to worker separations at the subject plant. The denial notice was published in the **Federal Register** on July 3, 2003 (68 FR 39976).

To support the request for reconsideration, the company supplied additional information to supplement that which was gathered during the initial investigation. Upon further review, it was revealed that sales and production figures provided in the initial investigation combined subject firm sales and production with import data. Subsequently, it was revealed that in fact sales and production declines did occur, and also that company imports increased in the relevant period, contributing to layoffs at the subject firm.

Conclusion

After careful review of the additional facts obtained on reconsideration, I conclude that increased imports of articles like or directly competitive with those produced at Rosewood Manufacturing Company, Inc., A Division of Blauer Company, Inc., Charleston, Mississippi, contributed importantly to the declines in sales or production and to the total or partial separation of workers at the subject firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Rosewood Manufacturing Company, Inc., A Division of Blauer Company, Inc., Charleston, Mississippi, who became totally or partially separated from employment on or after May 16, 2002, through two years from the date of this certification, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed in Washington, DC, this 11th day of July, 2003.

Elliott S. Kushner,
Certifying Officer, Division of Trade Adjustment Assistance.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-285]

Omaha Public Power District, Fort Calhoun Station, Unit 1; Exemption

1.0 Background

The Omaha Public Power District (the licensee) is the holder of Facility Operating License No. DPR-40 which authorizes operation of the Fort Calhoun Station, Unit 1 (FCS). The license provides, among other things, that the facility is subject to all rules, regulations, and orders of the U.S. Nuclear Regulatory Commission (NRC, the Commission) now or hereafter in effect.

The facility consists of a pressurized water reactor located in Washington County in Nebraska.

2.0 Request/Action

Title 10 of the Code of Federal Regulations (10 CFR), part 50, appendix G, which is invoked by 10 CFR 50.60, requires that pressure-temperature (P-T) limits be established for reactor pressure vessels (RPVs) during normal operating and hydrostatic or leak rate testing conditions. Specifically, appendix G to 10 CFR part 50 states that “[t]he appropriate requirements on * * * the pressure-temperature limits and minimum permissible temperature must be met for all conditions,” and “[t]he pressure-temperature limits identified as ‘ASME [American Society for Mechanical Engineers] Appendix G limits’ * * * require that the limits must be at least as conservative as limits obtained by following the methods of analysis and the margins of safety of Appendix G of Section XI of the ASME [Boiler and Pressure Vessel] Code.” Appendix G of 10 CFR part 50 also specifies that the Editions and Addenda of the ASME Code which are incorporated by reference in 10 CFR 50.55a apply to the requirements in appendix G to 10 CFR part 50. In the 2003 Edition of the Code of Federal Regulations, the NRC endorsed Editions and Addenda of the ASME Code through the 1998 Edition and 2000 Addenda. However, the licensee has currently incorporated the 1989 Edition of the ASME Code into the FCS licensing basis for defining the ASME Code requirements which apply to the plant’s ASME Code, Section XI program. Hence, with respect to the statements from appendix G to 10 CFR part 50 referenced above, it is the 1989 Edition of ASME Code, Section XI, Appendix G, which continues to apply for FCS. Finally, 10 CFR 50.60(b) states that,
