On December 6, 2013, the United States Court of Appeals for the District of Columbia Circuit granted in part a motion by Sorenson Communications, Inc. (Sorenson) seeking a stay of certain of the final rules. See Sorenson Communications, Inc. and *CaptionCall, LLC v. FCC*, D.C. Cir., No. 13–1246, December 6, 2013, at 1–2 (Stay Order). Specifically, the Court stayed “the rule adopted by the Commission prohibiting compensation to providers for minutes of use generated by equipment consumers received from providers for free or for less than \$75.” For the purpose of maintaining the status quo until the court issues a final ruling in court proceedings No. 13–1246 and consolidated No. 13–1122, the Commission therefore seeks to extend OMB approval of OMB Control Number 3060–1182 for a period of three years.

SUPPLEMENTARY INFORMATION: This notice requests public comment on the FDIC’s request for extension of OMB’s approval of the Regulatory Capital Rules information collection more fully described below. OMB approved the ICR under emergency procedures for review and clearance in accordance with the PRA. The FDIC is not proposing any changes to the existing ICR at this time. A description of the collection and the current burden estimates follows.

Proposal to extend the following currently approved collection of information:

Title: Regulatory Capital Rules.

OMB Number: 3064–0153.

Affected Public: State nonmember banks, state savings associations, and certain subsidiaries of those entities.

Estimated Number of Respondents: Advanced approaches—8; Minimum capital ratios—4,571; Standardized approach—4,571.

Frequency of Response: Occasional.

Estimated Time per Response: Varied.

Total Estimated Annual Burden: 737,275 hours.

General Description of Collection:

This collection comprises the disclosure and recordkeeping requirements associated with minimum capital requirements and overall capital adequacy standards for insured state nonmember banks, state savings associations, and certain subsidiaries of those entities. The capital standards are consistent with agreements reached by the Basel Committee on Banking Supervision (BCBS) in “Basel III: A Global Regulatory Framework for More Resilient Banks and Banking Systems,” and with section 171 of the Dodd-Frank Act, which requires establishment of minimum risk-based and leverage capital requirements, and with section 939A of the Dodd-Frank Act, which requires the use of alternatives to credit ratings for calculating risk-weighted assets. The data is used by the FDIC to evaluate capital before approving various applications by insured depository institutions, to evaluate capital as an essential component in determining safety and soundness, and to determine whether an institution is subject to prompt corrective action provisions.

Request for Comment

All comments will become a matter of public record.

Dated at Washington, DC, this 28th day of April 2014.
