

Alternative Use of Resources

The action does not involve the use of any different resources than those previously considered in NUREG-1437, Supplement 4 prepared for license renewal of HNP.

Agencies and Persons Consulted

In accordance with its stated policy, on February 19, 2014, the staff notified the Georgia State official, Mr. Chuck Mueller, of the Georgia Department of Natural Resources, regarding the environmental impact of the proposed action. The State official had no comments.

Additionally, the staff contacted the FWS in August 2013 as part of soliciting comments and obtaining concurrence on the staff's biological assessment for the Altamaha spiny mussel, as part of informal Section 7 consultation under the Endangered Species Act. The FWS's comments and findings with respect to the proposed action have been noted and are further discussed under the sections for Federally Protected Species and Cumulative Impacts in this environmental assessment.

III. Finding of No Significant Impact

The NRC is considering issuing an amendment for Renewed Facility Operating License Nos. DPR-57 and NPP-5, issued to Southern Nuclear Operating Company (SNC) for operation of the Edwin I. Hatch Nuclear Plant (HNP), Units 1 and 2, to revise the minimum water level referenced in the Technical Specification (TS) associated with the Limiting Condition for Operation for the plant service water (PSW) system and ultimate heat sink. The TS change would revise the minimum water level in the PSW pump well from 60.7 feet (ft) (18.5 meters [m]) to 60.5 ft (18.4 m) mean sea level.

On the basis of the environmental assessment included in Section II above and incorporated by reference in this finding, the NRC concludes that the proposed action will not have significant effects on the quality of the human environment. The proposed action has no significant impacts on surface water or ground water resources, no significant effect on aquatic resources, and no adverse effects on terrestrial species or habitat. In addition, the action is not likely to adversely affect any endangered species or affect a critical habitat, and the radiological and cumulative impacts are either negligible or are not significant. Accordingly, the NRC decided not to prepare an environmental impact statement for the proposed action.

The environmental documents related to this finding and listed below are

available for public inspection and may be inspected online through the NRC's Agencywide Documents Access and Management System (ADAMS) at <http://www.nrc.gov/reading-rm/adams.html>. You may also inspect these documents at the NRC's Public Document Room as described previously.

Hatch Nuclear Plant, Units 1 and 2—Final Report (NUREG-1437, Supplement 4; ADAMS Accession No. ML011420018); NRC's August 31, 2000 biological assessment regarding the effects of SNC's then-proposed license renewal for HNP on the shortnose sturgeon (ADAMS Accession No. ML003746456); NRC's revised biological assessment of July 2004 (ADAMS Accession No. ML041910254); NMFS's concurrence with the conclusion of that biological assessment in August 2005 (ADAMS Accession No. ML052640354); the NRC's August 2013 biological assessment for the Altamaha spiny mussel (ADAMS Accession No. ML13193A366); and FWS's concurrence with the conclusion in that biological assessment (ADAMS Accession No. ML14006A295).
