In addition, the defendant may submit its programming contracts covering the area specified in the complaint with its answer to refute allegations concerning the existence of an impermissible exclusive contract. If there are no contracts governing the specified area, the defendant shall so certify in its answer. Any contracts submitted pursuant to this provision may be protected as proprietary pursuant to Section 76.9 of this part.

47 CFR 76.1003(e)(3) requires an answer to a discrimination complaint to state the reasons for any differential in prices, terms, or conditions between the complainant and its competitor, and to specify the particular justification set forth in Section 76.1002(b) of this part relied upon in support of the differential.

The respondent shall have the opportunity to object to any request for documents that are not in its control or relevant to the dispute. Such request shall be heard, and determination made, by the Commission. Until the objection is ruled upon, the obligation to produce the disputed material is suspended. Any party who fails to timely provide discovery requested by the opposing party to which it has not raised an objection as described above, or who fails to respond to a Commission order for discovery material, may be deemed in default and an order may be entered in accordance with the allegations contained in the complaint, or the complaint may be dismissed with prejudice.

47 CFR 76.1003(l) permits a program access complainant seeking renewal of an existing programming contract to file a petition along with its complaint requesting a temporary standstill of the price, terms, and other conditions of the existing programming contract pending resolution of the complaint, to which the defendant will have the opportunity to respond within 10 days of service of the petition, unless otherwise directed by the Commission.

47 CFR 76.1302(a) states that any video programming vendor or multichannel video programming distributor aggrieved by conduct that it believes constitute a violation of the program carriage rules may commence an adjudicatory proceeding at the Commission to obtain enforcement of the rules through the filing of a complaint. 47 CFR 76.1302(e)(2) states that an answer to a program carriage complaint shall address the relief requested in the complaint, including legal and documentary support, for such response, and may include an alternative relief proposal without any prejudice to any denials or defenses raised.

47 CFR 76.1302(f) states that within twenty (20) days after service of an answer, unless otherwise directed by the Commission, the complainant may file and serve a reply which shall be responsive to matters contained in the answer and shall not contain new matters.

47 CFR 76.1302(h) states that any complaint filed pursuant to this subsection must be filed within one year of the date on which one of three events occurs.

47 CFR 76.1302(j)(1) states that upon completion of such adjudicatory proceeding, the Commission shall order appropriate remedies, including, if necessary, mandatory carriage of a video programming vendor's programming on defendant's video distribution system, or the establishment of prices, terms, and conditions for the carriage of a video programming vendor's programming.

47 CFR 76.1302(k) permits a program carriage complainant seeking renewal of an existing programming contract to file a petition along with its complaint requesting a temporary standstill of the price, terms, and other conditions of the existing programming contract pending resolution of the complaint, to which the defendant will have the opportunity to respond within 10 days of service of the petition, unless otherwise directed by the Commission. To allow for sufficient time to consider the petition for temporary standstill prior to the expiration of the existing programming contract, the petition for temporary standstill and complaint shall be filed no later than thirty (30) days prior to the expiration of the existing programming contract.

47 CFR 76.1513(a) permits any party aggrieved by conduct that it believes constitute a violation of the FCC's regulations governing open video systems or in section 653 of the Communications Act (47 U.S.C. 573) to commence an adjudicatory proceeding at the Commission to obtain enforcement of the rules through the filing of a complaint, which must be filed and responded to in accordance with the procedures specified in Section 76.7, except to the extent such procedures are modified by Section 76.1513.

47 CFR 76.1513(b) provides that an open video system operator may not provide in its carriage contracts with programming providers that any dispute must be submitted to arbitration, mediation, or any other alternative method for dispute resolution prior to submission of a complaint to the Commission.

47 CFR 76.1513(c) requires that any aggrieved party intending to file a complaint under this section must first notify the potential defendant open video system operator that it intends to file a complaint with the Commission based on actions alleged to violate one or more of the provisions contained in this part or in Section 653 of the Communications Act. The notice must be in writing and must be sufficiently detailed so that its recipient(s) can determine the specific nature of the potential complaint. The potential complainant must allow a minimum of ten (10) days for the potential defendant(s) to respond before filing a complaint with the Commission.

47 CFR 76.1513(d) describes the contents of an open video system complaint.

47 CFR 76.1513(e) states that an open video system operator upon which a complaint is served under this section shall answer within thirty (30) days of

service of the complaint and specifies the requirements for such answers.

47 CFR 76.1513(f) states within twenty (20) days after service of an answer, the complainant may file and serve a reply which shall be responsive to matters contained in the answer and shall not contain new matters.

47 CFR 76.1513(g) requires that any complaint filed pursuant to this subsection must be filed within one year of the date on which one of three events occurs.

47 CFR 76.1513(h) states that upon completion of the adjudicatory proceeding, the Commission shall order appropriate remedies, including, if necessary, requiring carriage, awarding damages to any person denied carriage, or any combination of such sanctions. Such order shall set forth a timetable for compliance, and shall become effective upon release.

Needs and Uses: On June 23, 2023, the Commission released a Third Report and Order (Third R&O), FCC 23–53, in GN Docket No. 16–142. In this Third R&O, the Commission makes changes to its Next Gen TV rules designed to preserve over-the-air (OTA) television viewers' access to multicast streams during television broadcasters' transition to ATSC 3.0.

Multicast Licensing. The Commission generally adopts its proposal in the Next Gen TV Multicast Licensing FNPRM to allow a Next Gen TV station to seek modification of its license to include certain of its non-primary video programming streams (multicast streams) that are aired on “host” stations during a transitional period. In adopting this proposal, the Commission follows the same licensing framework, and to a large extent the same regulatory regime, established for the simulcast of primary video programming streams on “host” station facilities.

Form 2100. The Commission adopts the Next Gen TV Multicast Licensing FNPRM's proposal to modify its Next Gen TV license application form (FCC Form 2100) to accommodate multicast licensing by collecting information similar to that already collected in the interim STA process. The Commission requires certain additional information as an addendum to Form 2100 if stations seek to include hosted multicast streams within their license. It also clarifies and slightly modifies the requirements of its rules governing Form 2100 to reflect the possibility of reliance on multiple hosts.

Specifically, applicants must prepare an Exhibit identifying each proposed hosted stream and provide the following information about each stream, as broadcast:

- the host station;
- channel number (RF and virtual);
- network affiliation (or type of programming if unaffiliated);
- resolution (e.g., 1080i, 720p, 480p, or 480i);
- the predicted percentage of population within the noise limited service contour served by the station's original ATSC 1.0 signal that will be served by the host, with a contour overlay map identifying areas of service loss and, in the case of 1.0 streams, coverage of the originating station's community of license; and
- whether the stream will be simulcast, and if so, the “paired” stream in the other service. Finally, the Exhibit must either state that the applicant will be airing the same programming that it is airing in 1.0 at the time of the application or identify the station that has aired or is airing the same or a similar programming lineup at the same resolutions on the same type of facility (individual or shared), as well as that station's lineup (with resolutions). This Exhibit must be placed on the applicant's public website or in the applicant's online public inspection file if the station does not have a dedicated website, with a link provided in the application. This information is

consistent both with that currently collected in STA applications and the approach identified in the Next Gen TV Multicast Licensing FNPRM. As with broadcast licenses generally, modifications to this license application or its accompanying exhibit (with respect to the primary or multicast streams) must be preceded by the filing and approval of a new application. Changes to the affiliation or content of a stream, or the elimination of a stream, however, do not implicate the concerns raised in this proceeding if they would not result in the use of additional capacity and if information about the change is easily available to the public. Therefore, in order to streamline this process for both broadcasters and the Commission, such changes may be implemented without prior Commission approval. They need only be reflected in a timely update to the Exhibit that the applicant makes available on its public website or in the applicant's online public inspection file and in an email notice to the Chief of the Media Bureau's Video Division. The new information collection requirements are contained in §§ 73.3801(f) and (i), 73.6029(f) and (i), and 74.782(g) and (j) of the Commission's rules.

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility;

the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

DATES: Written PRA comments should be submitted on or before November 28, 2023. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to PRA@fcc.gov and to Cathy.Williams@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION: The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

Title: Section 90.621, Selection and Assignment of Frequencies and Section 90.693, Grandfathering Provisions for Incumbent Licensees.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; Not-for-profit institutions; and State, Local, or Tribal Government.

Number of Respondents: 596 respondents; 596 responses.

Estimated Time per Response: 1.5 hours.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 154(i) and 309(j).

Total Annual Burden: 894 hours.

Total Annual Cost: \$74,500.

Needs and Uses: Section 90.621(b)(4) allows stations to be licensed at distances less than those prescribed in the Short-Spacing Separation Table where applicants “secure a waiver.” Applicants seeking a waiver in these

circumstances are still required to submit with their application an interference analysis, based upon any of the generally-accepted terrain-based propagation models, demonstrating that co-channel stations would receive the same or greater interference protection than provided in the Short-Spacing Separation Table.

Section 90.621(b)(5) permits stations to be located closer than the required separation, so long as the applicant provides letters of concurrence indicating that the applicant and each co-channel licensee within the specified separation agree to accept any interference resulting from the reduced separation between systems. Applicants are still required to file such concurrence letters with the Commission. Additionally, the Commission did not eliminate filings required by provisions such as international agreements, its environmental (National Environmental Protection Act (NEPA)) rules, its antenna structure registration rules, or quiet zone notification/filing procedures.

Section 90.693 requires that 800 MHz incumbent Specialized Mobile Radio (SMR) service licensees “notify the Commission within 30 days of any changes in technical parameters or additional stations constructed that fall within the short-spacing criteria.” It has been standard practice for incumbents to notify the Commission of all changes and additional stations constructed in cases where such stations are in fact located less than the required 70 mile distance separation, and are therefore technically “short-spaced,” but are in fact fully compliant with the parameters of the Commission's Short-Spacing Separation Table.

The Commission uses this information to determine whether to grant licenses to applicants making “minor modifications” to their systems which do not satisfy mileage separation requirements pursuant to the Short-Spacing Separation Table.
