Atlantic Highly Migratory Species; Transshipment, Port Inspection, and Vessel Identification**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and

Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to revise the regulations governing transshipment and international port inspection for vessels with Atlantic highly migratory species (HMS) permits to implement recommendations adopted at recent meetings of the International Commission for the Conservation of Atlantic Tunas (ICCAT). The proposed rule would expand the current prohibition on transfer at sea to include any tuna, tuna-like species, or other Atlantic HMS both at sea and in port inside the Atlantic Ocean, and also prohibit the transfer of Atlantic HMS by U.S. vessels outside of the Atlantic Ocean and its surrounding seas. However, tuna purse seine vessels would still be allowed to transfer Atlantic bluefin tuna from the catcher vessel to the receiving vessel in certain limited circumstances. Additionally, the proposed rule would revise current regulations for U.S.-permitted vessels landing tuna, tuna-like species, or other HMS in foreign ports or making port calls in foreign ports to update information and reporting procedures. NMFS is also notifying vessels with HMS permits of a proposed requirement that they provide an International Maritime Organization (IMO)/Lloyd's Registry (LR) number on their permit application by no later than January 1, 2016. The purpose of this proposed rule is to ensure U.S. compliance with ICCAT recommendations and to facilitate implementation of international monitoring, control, and surveillance measures for Atlantic HMS.

DATES: Written comments must be received on or before October 14, 2014.

ADDRESSES: You may submit comments, identified by “NOAA–NMFS–2014–0063”, by any of the following methods:

SUPPLEMENTARY INFORMATION: Atlantic HMS fisheries are managed under the Consolidated HMS FMP and regulations at 50 CFR part 635, pursuant to the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), and the Atlantic Tunas Convention Act (ATCA). Under ATCA, the Secretary promulgates such regulations as may be necessary and appropriate to carry out ICCAT recommendations. In 2012 and 2013, ICCAT adopted binding measures for its Contracting Parties to further combat illegal, unregulated, and unreported (IUU) fishing activities. Consistent with these recent ICCAT recommendations, this proposed rule would implement domestic regulations for vessels that are issued HMS permits, or are required to be issued HMS permits, pertaining to transfer at sea and transshipment, and international port inspection. It also notifies owners of commercial HMS-permitted vessels that are 20 meters or greater in length overall of the need to obtain an IMO/LR number by no later than January 1, 2016.

Transfer at Sea and Transshipment

ICCAT Recommendation 12–06 expands and strengthens ICCAT's previously adopted program for transshipment. Specifically, it eliminates a broad exemption for vessels under 24 meters, expands coverage to all ICCAT species whether transshipped
