Supplementary Information: In July 1943, the Tennessee Valley Authority (TVA), the DOI, the State of North Carolina, and Swain County, entered into a Memorandum of Agreement (MOA) that dealt with the creation of Fontana Dam and Reservoir and the flooding of lands and road within Swain County. As part of that agreement, 44,170 acres of land were ultimately transferred to the DOI and made part of GSMNP. The MOA also contained a provision by which the DOI was to construct a road through the Park, along the north shore of the newly formed Fontana Reservoir, to replace the flooded NC 288, contingent upon funds being appropriated by Congress.

The DEIS evaluates potential environmental consequences, of implementing the action alternatives, on GSMNP and the Appalachian National Scenic Trail. Impact topics include the human environment, physical environment, natural and cultural resources, aesthetics and visual resources, visitor use and experience, and park operations. Direct, indirect, and cumulative impacts along with options to address potential impacts were evaluated and are described for each resource area.

The public is advised that it is the practice of the NPS to make comments, including individual names and addresses of respondents, available for public review during regular business hours. There are circumstances in which a person prefers to have his or her name and other information withheld from the public record. Any

person wishing to do this must state this prominently at the beginning of any correspondence or comment, and the request will be honored to the extent allowable by law. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be placed on the public record and will be made available for public inspection in their entirety. Anonymous comments will be included in the public record, however, the NPS is not legally required to consider or respond to anonymous comments.

The DEIS is being mailed to appropriate Federal, State and local agencies and organizations which have been involved with the project, have expressed, or are known to have an interest or legal role in this proposal.

After public review of the DEIS, the National Park Service will consider comments, and a Final EIS followed by a Record of Decision will be prepared. The Final EIS is scheduled for completion in November 2006.
