SUPPLEMENTARY INFORMATION: The subject amendment to Permit No. 22187-02 is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*) and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

On November 18, 2021, notice was published in the **Federal Register** (86 FR 64457) that a request for an amendment to a scientific research permit for research on northern elephant seals (*Mirounga angustirostris*) had been submitted by the above-named applicant. Following the close of the public comment period, the applicant made several substantive changes to the amendment request; therefore, the original request has been withdrawn from further consideration and a revised amendment request has been submitted.

Permit No. 22187-02, issued on December 13, 2021, authorizes the permit holder to conduct research to establish a catalog of known individual northern elephant seals along the California coast. Types of authorized takes include behavioral observations, measurements, bioacoustic recordings, acoustic playbacks, marking, flipper tagging, capture, and non-invasive physiological sampling. The permit holder is requesting the permit be amended to include authorization for 25 additional takes of northern elephant seals per year at two locations in California. Each animal would be handled up to three times per year. At

first handling, each animal will be flipper tagged. At the second handling, each animal will be captured by hand or net, sedated and fitted with satellite transmitters, in addition to the physiological sampling already authorized. At the third handling, approximately three months later, animals would be recaptured to remove the instruments. Five additional takes are requested for animals that are captured and released because they are not appropriate candidates for the study. An additional 200 harbor seal (*Phoca vitulina*) takes and 185 elephant seal takes are requested annually for unintentional harassment during these activities. The permit holder is requesting two mortalities, an increase in the number of annual mortalities from one animal to two, but the total number of mortalities (five) allowed across the life of the permit will not change. The permit would remain valid until March 31, 2024.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: February 1, 2022.

Chief, Permits and Conservation Division,

Marine Fisheries Service.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved information collection. Under the provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), NOAA's National Marine Fisheries Service (NMFS) is responsible for management of the nation's marine fisheries. Existing regulations require operators of tournaments involving Atlantic highly migratory species (HMS; Atlantic swordfish, sharks, billfish, and tunas) to register four weeks in advance of the tournament. Operators must provide contact information and the tournament's date(s), location(s), and target species. Operators are required to submit an HMS tournament summary report within seven days after tournament fishing has ended. Most of the catch data in the summary report is routinely collected in the course of regular tournament operations. NMFS uses the data to estimate the total annual catch of HMS and the impact of tournament operations in relation to other types of fishing activities. In addition, HMS tournament registration provides a method for tournament operators to request educational and

regulatory outreach materials from NMFS. No changes to the reporting requirements are being made at this time.

II. Method of Collection

Operators have the choice of registering and reporting online or by electronic or paper forms. Methods of submittal include online submission (registering/reporting), email of electronic forms, and mail of paper forms.
