DATES: Consideration will be given to all comments received by March 14, 2022.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Project Manager Army Data Analytics Platforms Climate Survey; OMB Control Number 0702–RDAP.

Type of Request: New.

Number of Respondents: 184.

Responses per Respondent: 1.

Annual Responses: 184.

Average Burden per Response: 30 minutes.

Annual Burden Hours: 92.

Needs and Uses: The Project Manager Army Data Analytics Platforms (PM ARDAP) Climate Survey is seeking feedback from its civilian, military, and contractor personnel to assess how they feel about the organization and their work environment. The responses will enable PM ARDAP leadership to assess and determine where changes are required. Though the survey is intended to reach all personnel, this proposed collection request only covers public respondents (contractor personnel) as required by the Paperwork Reduction Act. PM ARDAP will distribute this Climate Survey using the MilSuite survey feature, which enables PM ARDAP to create a custom survey for organization-wide distribution with advanced survey statistics to capture, review, and share the responses. Respondents will access and provide

their responses to the collection instrument online. They will receive a link that takes them directly to the PM ARDAP Climate Survey in MilSuite. The PM ARDAP Operations Team will review the survey responses and provide data and subsequent analysis to PM ARDAP leadership. The results will enable PM ARDAP leadership to communicate areas for improvement, actions they plan to take or have taken, and if the changes address the areas in need of improvement with its personnel. Additionally, since the survey is annual, PM ARDAP will be able to review and analyze data year to year to identify trends.

Affected Public: Individuals or households.

Submission for OMB Review; Comment Request

AGENCY: U.S. Army Corps of Engineers, Department of Defense (DoD).

ACTION: 30-Day information collection notice.

SUPPLEMENTARY INFORMATION:

Title: Associated Form; and **OMB Number:** Benefits of Puerto Rico Beaches; OMB Control Number 0710-CBRS.

Type of Request: New.

Number of Respondents: 2050.

Responses per Respondent: 1.

Annual Responses: 2050.

Average Burden per Response: 15 minutes.

Annual Burden Hours: 512.5.

Needs and Uses: The purpose of this study is to employ necessary methods of welfare economics for analyzing the net economic value of beach re-nourishment. The U.S. Army Corps of Engineers Principles and Guidelines stipulates that when beach visitation exceeds the 750,000 annual visitation threshold, contingent valuation or travel cost method are the required metrics for measuring benefits accruing from recreation. This study will produce empirical estimates of economic value of beach replenishment, focusing on recreation value, how recreation value varies with programmatic attributes, and economic impacts stemming from changes in recreation and recreation value. This study will employ utility-theoretic micro-econometric models, with revealed and stated preference data, and will focus on San Juan, Puerto Rico. This project is being conducted as part of the Puerto Rico Coastal Study and the San Juan Metro Area, Puerto Rico Study. Section 204 of the River and Harbor Act of 1970 (Pub. L. 91-611) authorizes the Secretary of the Army, acting through the Chief of Engineers, to prepare plans for the development, utilization and conservation of water and related land resources of drainage basins and coastal areas in the Commonwealth of Puerto Rico. The project consists of two distinct survey

collections. The "Puerto Rico Beaches" survey will measure beach visitation and erosion management preferences for Puerto Rico residents, and the "Caribbean Visitor Survey" will measure beach visitation and erosion management preferences for U.S. visitors to Puerto Rico.

Affected Public: Individuals or households.

Frequency: On occasion.

Respondent's Obligation: Voluntary.
