Forest Service

Title: National Visitor Use Monitoring, and Customer and Use Survey Techniques for Operations, Management, Evaluation, and Research.

OMB Control Number: 0596-0110.

Summary of Collection: The National Forest Management Act (NFMA) of 1976 and the Forest and Rangeland Renewable Resources Act (RPA) of 1974 require a comprehensive assessment of present and anticipated uses, demand for and supply of renewable resources from the nation's public and private forests and rangelands. The Forest Service (FS) is required to report to Congress and others in conjunction with these legislated requirements as well as the use of appropriated funds. An important element in the reporting is the number of visits to National Forests and Grasslands, as well as to Wilderness Areas that the agency manages. The Customer and Use Survey Techniques for Operations, Management, Evaluation and Research (CUSTOMER) study combines several different survey approaches to gather data describing visitors to and users of public recreation lands, including their trip activities, satisfaction levels, evaluations, demographic profiles, trip characteristics, spending, and annual visitation patterns. FS will use face-to-face interviewing for collecting information on-site as well as written survey instruments to be mailed back by respondents.

Need and Use of the Information: FS plans to collect information from a variety of National Forests and other recreation areas. Information gathered through the various Customer modules has been and will continue to be used by planners, researchers, managers, policy analyst, and legislators in resource management areas, regional offices, regional research stations, agency headquarters, and legislative offices.

Description of Respondents: Individuals or households.

Number of Respondents: 66,000.

Frequency of Responses: Reporting; Quarterly; Annually.
