

economic analysis. The results from this survey should be useful to NMFS and the public in the future as NMFS considers various actions under the recovery planning process for Cook Inlet beluga whales. Any future regulatory actions would include analyses of costs and benefits of the proposed measures as well as opportunities for public input.

During 2011, NMFS fielded a pilot version of the survey to a small number of U.S. households, primarily to evaluate the survey administration procedures prior to sending the survey out to a larger and more representative sample. The results of this pretest indicated the need to make minor adjustments to the survey administration (e.g., timing of mailings and telephone calls), which will be incorporated in the data collection to which this notice pertains.
