SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060-1048.

Title: Section 1.929(c)(1), Computer Interference Contour (CIC).

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions, and state, local or tribal government.

Number of Respondents: 50.

Estimated Time Per Response: 2 hours.

Frequency of Response: On occasion and annual reporting requirement and recordkeeping requirement.

Nature of Response: Required to obtain or retain benefits.

Total Annual Burden: 100 hours.

Annual Cost Burden: N/A.

Privacy Act Impact Assessment: N/A.

Needs and Uses: This collection will be submitted as an extension (no change in reporting requirements) after this 60 day comment period to Office of Management and Budget (OMB) in order to obtain the full three year clearance. There is no change in respondents or burden hours. Section 1.929(c)(1) requires any increase in the composite interference contour (CIC)¹ of a site-based licensee in the Paging and Radiotelephone Service, Rural Radiotelephone Service, or 800 MHz Specialized Mobile Radio Service is a major modification of a license that requires prior Commission approval. However, on April 28, 2003, the Commission released a Notice of Proposed Rulemaking (NPRM) in WT Docket No. 03-103 (68 FR 44003), which proposed to amend Section 1.929(c)(1) of the Commission's rules to specify that expansion of a composite

¹ A CIC connects the outmost points of the intersecting interference contour for the base station in a radio system. However, an incumbent's valid CIC does not include areas surrounded by the composite interior contour that are not part of the interference contours of the incumbent's individual sites. See Revision of Parts 22 and 90 of the Commission's Rules to Facilitate Future Development of Paging System's and Implementation of Section 309(j) of the Communications Act—Competitive Bidding, *Memorandum Opinion and Order on Reconsideration and Third Report and Order*, 14 FCC Rcd 10030, 10055 ¶ 35 (1999).

interference contour (CIC) of a site-based licensee in the Paging and Radiotelephone Service—as well as the Rural Radiotelephone Service and 800 MHz Specialized Mobile Radio Service—over water on a secondary, non-interference basis should be classified as a minor (rather than major) modification of a license. Such reclassification would eliminate the filing requirements associated with these license modifications, but require site-based licensees to provide the geographic area licensee (on the same frequency) with the technical and engineering information necessary to evaluate the site-based licensee's operation over water. The purpose of this collection is to enable the geographic licensee to have technical and engineering information regarding a site-based licensee's operations over water in order to guard against unacceptable interference to its own operations(s).

Respondents: Business or other for-profit entities.

Number of Respondents: 1,200.

Needs and Uses: In October 2002, the Commission released the First Report and Order (“Order”), Digital Audio Broadcasting Systems and Their Impact on the Terrestrial Radio Broadcast Service, FCC 02–286, MM Docket 99–325, (67 FR 78193). Pursuant to this Order, the Commission selected in-band, on-channel (IBOC) as the technology that permits AM and FM radio broadcasters to introduce digital operations efficiently and rapidly. In addition, provisions of the Order required radio station licensees to provide information relative to implementation of interim hybrid digital operations. Implementation of hybrid digital operations is entirely voluntary. Commercial and noncommercial AM and FM radio stations that choose to begin hybrid digital transmissions shall notify the Commission within 10 days of the commencement of digital operations. The notification letter shall certify that the digital operations conform to applicable rule and standards. Furthermore, implementation of the notification letter eliminates both the need for the FCC staff to issue a Special Temporary Authority (STA) to the broadcaster and for the broadcaster to file and pay the initial and any subsequent filing fees.
