SUPPLEMENTARY INFORMATION: Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires: Written comments and/or suggestions from the public and affected agencies are invited to address one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Proposed Collection Title: Generic Clearance to Collect Research or Educational Tools and Resources, 0925–NEW, exp., date XX/XX/XXXX, Project Clearance Branch (PCB), Office of Policy and Extramural Research Administration (OPERA), Office of the

Director (OD), Office of Extramural Research (OER) National Institutes of Health (NIH).

Need and Use of Information Collection: The purpose of this generic is to allow for the collection of information that exist outside the currently approved NIH generics, OMB control numbers #0925–0740 titled, “Conference, Meeting, Workshop, and Poster Session Registration and #0925–0648 titled, “Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.” The purpose of this information collection is to collect and disseminate NIH-identified resources more broadly to the public, on Institutes and Centers’ (ICs) websites, and/or collect information for agency internal use to improve scientific and related practices and/or assist in scientific reviews (e.g., to understand the use of research or educational resources and resource limitations, to promote scientific and public collaboration, public dissemination, and program guidance.) NIH plans to collect researcher and educational information, related administrative or operational information, and related project information in order to share widely with a range of audiences such as researchers, patients and advocates, and the general public. The primary purpose of information collections under this generic is to identify and ultimately promote interdisciplinary research, best practices, and collaboration among academia, industry, non-profit, and other public actors. The various types of information collected through this clearance may include soliciting names from the public, relevant communities of practice, or within NIH to recruit appropriate scientific expertise. Requests to the public may include requests to identify and/or describe extramural research, research tools, or existing resources. Requests for population characteristics within crowdsourcing mechanisms may include institutional affiliation and career level/stage. This will allow ICs to determine which functionalities are typically used, assess engagement and population characteristics of communities of practice, and prioritize investments and design future improvements for related tools and resources.
