l. *Description of Request:* The licensee proposes to replace the Hauser Development's Units 3 and 6 S. Morgan Smith horizontal Francis turbines with new Mavel vertical Z Kaplan turbines. The licensee would also replace the generators for Units 3 and 6. The proposed upgrade would result in a 0.96 MW increase in the authorized installed capacity of the development, to 20.28 MW, and would result in a decrease to the hydraulic capacity of the development of 5.92%, from 4,560 cubic feet per second (cfs) to 4,290 cfs. The total authorized installed capacity for the entire project would increase from 319.05 MW to 320.01 MW. The licensee states that the upgrades would not cause any change in the operation of the project or have quantifiable environmental effects, and only a minor effect on hydraulic flows. All construction would occur within the footprint of the powerhouse and there would be no land disturbance.
