II. Background

On April 24, 2018, FMCSA published a notice announcing its decision to renew exemptions for 197 individuals from the insulin-treated diabetes mellitus prohibition in 49 CFR 391.41(b)(3) to operate a CMV in interstate commerce and requested comments from the public (FR 75 FR 13647; 75 FR 14652; 75 FR 27616; 75 FR 28684; 77 FR 17111; 77 FR 18302; 77 FR 27841; 77 FR 29446; 79 FR 10612; 79 FR 14579; 79 FR 18400; 79 FR 22573; 79 FR 27685; 79 FR 28590; 79 FR 29262; 79 FR 35855; 81 FR 21649; 81 FR 24161; 81 FR 59723; 82 FR 20966; 82 FR 24434). The public comment period ended on May 24, 2018, and no comments were received.

As stated in the previous notice, FMCSA has evaluated the eligibility of these applicants and determined that renewing these exemptions would achieve a level of safety equivalent to or greater than the level that would be achieved by complying with the current regulation 49 CFR 391.41(b)(3).

The physical qualification standard for drivers regarding diabetes found in 49 CFR 391.41(b)(3) states that a person is physically qualified to drive a CMV if that person has no established medical history or clinical diagnosis of diabetes mellitus currently requiring insulin for control.

III. Discussion of Comments

FMCSA received no comments in this proceeding.

II. Background

On April 27, 2018, FMCSA published a notice announcing receipt of applications from 14 individuals requesting an exemption from vision requirement in 49 CFR 391.41(b)(10) and requested comments from the public (83 FR 18644). The public comment period ended on May 29, 2018, and no comments were received.

FMCSA has evaluated the eligibility of these applicants and determined that granting the exemptions to these individuals would achieve a level of safety equivalent to or greater than the level that would be achieved by complying with the current regulation 49 CFR 391.41(b)(10).

The physical qualification standard for drivers regarding vision found in 49 CFR 391.41(b)(10) states that a person is physically qualified to driver a CMV if that person has distant visual acuity of at least 20/40 (Snellen) in each eye without corrective lenses or visual acuity separately corrected to 20/40 (Snellen) or better with corrective lenses, distant binocular acuity of a least
