Title of Proposal: Neighborhood Networks Management and Tracking Data Collection.

OMB Approval Number: 2502-0553.

Description of the Need for the Information and Its Proposed Use: Neighborhood Networks is a community-based initiative that encourages the development of resource and community technology centers in HUD insured and assisted housing. In 2003, HUD conducted a national survey of Neighborhood Networks center directors to document center characteristics and identify commonalities and trends to guide the direction of the Neighborhood Networks initiative.

HUD is requesting clearance for a more comprehensive data collection instrument in 2004. The data collection is designed with the objective of merging information currently captured in a paper business plan with data currently collected through the survey of center directors. This approach will be a multi-step iterative process as the business plan is evolving from a paper submission to an enhanced and more comprehensive online tool known as START—the Strategic Tracking and Reporting Tool. Once the transition is complete, START will be the mechanism by which all center data are collected.

Frequency of Submission: Annually.
