[Project No. 14990-000]

Pumped Hydro Storage, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On May 3, 2019, Pumped Hydro Storage, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of a closed loop pumped storage project in Maricopa County, Arizona. On August 1, 2019, the applicant filed a revised application for the project to address Commission staff's June 19, 2019 comments. The sole purpose of a preliminary permit, if issued, is to grant

the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed Salt River Project Indian Spring Pumped Storage Project would consist of the following: (1) A new 240-foot-high, 1,000-foot-long upper dam and reservoir; (2) a new 260-foot-high, 2,200-foot-long lower dam and reservoir; (3) six 250-megawatt, turbine-generator units, for a total installed capacity of 1,500 megawatts; (4) a new 200-foot-long, 345-kilovolt transmission line from the powerhouse to an existing grid interconnection point; and (5) appurtenant facilities. The proposed project would have an average annual generation of 3,285 gigawatt-hours.
