

achieved by complying with the current regulation 49 CFR 391.41(b)(10).

The determining criteria for and the conditions and requirements of the exemptions, to which all exempted drivers are subject, were discussed in detail when the docket was originally published (79 FR 35212). As always, any adverse comments that come in after the exemption is granted will be evaluated, and if they indicate that the driver is not achieving a level of safety equivalent to, or greater than, the level of safety that would be obtained by complying with the regulation, the exemption will be revoked. When granted, the exemptions will enable these individuals with vision deficiencies in one eye to operate in interstate commerce.

SUPPLEMENTARY INFORMATION: VA's draft policy and implementation plan for increased public access to the results of its research was developed in response to recent White House initiatives on federally-funded scientific research. In its February 22, 2013, memorandum, the White House Office of Science and Technology Policy (OSTP) directed each Federal agency with over \$100 million in annual expenditures for the conduct of research and development to develop a plan to support increased public access to the results of research funded by the Federal Government, including digital data sets and results published in peer-reviewed scholarly publications arising directly from federally-funded research (OSTP, *Increasing Access to the Results of Federally Funded Scientific Research*, February 22, 2013).

In implementing policies on public access to research publications and digital research data, VA must first remain cognizant of its ethical and legal obligations to safeguard the privacy of Veterans (and VA's other research subjects) and the confidentiality of their private information, while promoting the highest quality science. VA also recognizes that Veterans and the public at-large have a substantive interest in accessing the results of the research that VA conducts. VA's responsibility precludes unlimited public access to private information about individual research subjects. With this in mind, VA has carefully weighed the public benefits versus the risks of harm to Veterans in establishing the draft requirements.

VA is committed to ensuring that the final study results, including peer-reviewed publications and digital data sets from VA-funded scientific research are made available to the scientific community, industry, and the general public with the fewest constraints possible, while protecting the privacy of the Veterans (and others) about whom research data are obtained and safeguarding the confidentiality of their data.

Proposed requirements for public access to scientific publications will apply to all peer-reviewed publications reporting results of research that are either funded by the VA Office of Research and Development (ORD) or conducted, supported, or sponsored by any Veterans Health Administration (VHA) program office.

Proposed requirements for public access to digital data will apply to the final research data underlying all peer-
