SUPPLEMENTARY INFORMATION:

A. Purpose

On February 19, 1998, a revised OMB Circular A-119, "Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities," was published in the **Federal Register** at 63 FR 8545, February 19, 1998. FAR Subparts 11.1 and 11.2 were revised and a solicitation provision was added at 52.211-7, Alternatives to Government-Unique Standards, to implement the requirements of the revised OMB circular. If an alternative standard is proposed, the offeror must furnish data and/or information regarding the alternative in sufficient detail for the Government to determine if it meets the Government's requirements. We believe the burden for FAR 52.211-7 to be negative, as it is purely a permissive means for offerors to propose reducing regulatory burden on a given solicitation. There are other places A-119 has an effect, though we believe these to be positive. One is by enabling the single process initiative. Another is the general replacement of Mil standards with commercial standards, e.g., ISO 9000. Also, A-119 is the basis for the language in FAR 53.105, which reduces the chaos in data standards development. The whole purpose of A-119 was to reduce regulatory burden by promoting the use of industry standards in lieu of federal ones.

To the extent that data on the annual frequency of the use of voluntary consensus standards under FAR 52.211-7 is not available, we believe 100 is reasonable. As an aside, FAR part 45 recognizes the use of voluntary consensus standards in the management of Government property. However, in these cases there is no Government standard per se, with the voluntary

consensus standard serving as the Government standard. Consequently, when under part 45 voluntary consensus standards are used, they are not an alternative to a Government standard under FAR 52.211-7.

Total Burden Hours: 100.

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405, telephone 202-501-4755. Please cite OMB Control No. 9000-0153, OMB Circular A-119, in all correspondence.

SUPPLEMENTARY INFORMATION:

A. Purpose

DoD, GSA, and NASA published a proposed rule at 78 FR 23194 on April 18, 2013, soliciting public comments on

the proposed rule and received one response.

DoD, GSA, and NASA are revising the FAR to require that offerors provide their Commercial and Government Entity (CAGE) codes to contracting officers and that, if owned by another entity, offerors will provide, in a new provision with their representations and certifications, the CAGE codes and names of such entity or entities. For those offerors located in the United States or its outlying areas that register in the System for Award Management (SAM), a CAGE code is assigned as part of the registration process. If SAM registration is not required, the offeror must request and obtain a CAGE code from the Defense Logistics Agency (DLA) Contractor and Government Entity Branch. A CAGE code is not required when a condition described at FAR 4.605(c)(2) applies and the acquisition is funded by an agency other than DoD or NASA. Offerors located outside the United States will obtain an NCAGE from their NATO Codification Bureau or, if not a NATO member or sponsored nation, from the NATO Support Agency (NSPA).

The Federal procurement community strives toward greater measures of transparency and reliability of data, to facilitate achievement of rigorous accountability of procurement dollars, processes, and compliance with regulatory and statutory acquisition requirements, e.g., the Federal Funding and Accountability and Transparency Act of 2006 (Pub. L. 109–282, 31 U.S.C. 6101 note). Increased transparency and accuracy of procurement data broaden the Government’s ability to implement fraud detection technologies restricting opportunities for mitigating occurrences of fraud, waste, and abuse of taxpayer dollars.

To further the desired increases in traceability and transparency, this rule uses the unique identification that a CAGE code provides, coupled with vendor representation of ownership and owner CAGE code. The CAGE code is a five-character alpha-numeric identifier used extensively within the Federal Government and will provide for standardization across the Federal Government. This rule will support successful implementation of business tools that provide insight into:

- Federal spending patterns across corporations;
- Traceability in tracking performance issues across corporations;
- Contractor personnel outside the United States; and
- Supply chain traceability and integrity efforts.

B. Analysis of Public Comments

Comment: In response to the notice of proposed rulemaking and the request for comment on the burden estimates, one respondent did question the burden estimates. The respondent indicated that the rule adds additional costs to the process not recognized in the rule. This relates to usability issues with SAM. The respondent indicated that, as a pilot, industry conducted hierarchy assessment and this took well over an hour without the additional revalidations required by SAM. The respondent requested that the FAR Council republish the rule for public comment after clarifying the issues raised.

Response: The FAR Council determined that a revision to the Paperwork Burden is not warranted. Obtaining a CAGE code is already a requirement for an active registration in SAM and for its predecessors the Online Representations and Certifications (ORCA) and the Central Contractor Registration (CCR) database. This final rule applies no new burden in that regard. Burden for registration in SAM was re-assessed as part of the rulemaking in the FAR case (FAR Case 2011–021) that established that requirement. Additionally, this final rule does not require the use of SAM to obtain the CAGE code(s) for the immediate owner or highest-level owner; although registration in SAM could be accomplished to do so for U.S. registrants (as U.S. registrants are assigned a CAGE code upon registration). It is true that it may take some time in larger organizations to update all of the contractor’s SAM registrations to include the immediate and highest-level owner CAGE information (if the contractor has hundreds of SAM records and it is updating them centrally and at the same time). However, including the data on an individual registration or renewal basis should not result in any significant additional time.

Annual Reporting Burden

The annual reporting burden to obtain CAGE codes is estimated as follows:

Respondents required to obtain a CAGE code	1,134.
Number of responses per respondent	1.
Total annual responses	1,134.
Preparation hours per response25
Subtotal response hours	284
Respondents required to obtain an NCAGE code	1,020.
Number of responses per respondent	1.
Total annual responses	1,020.

Preparation hours per response5
Subtotal response hours	510.
Total CAGE response burden hours	794

The annual reporting burden is estimated as follows to respond to ownership provision 52.204–YY requirements:

Respondents	413,808
Average responses per respondent	1
Total annual responses	413,808
Preparation hours per response5
Total response burden hours	206,904

The combined total of the CAGE hours and the ownership provision hours are 207,698 response burden hours.

Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405, telephone 202–501–4755. SUPPLEMENTARY INFORMATION:

A. Purpose

This information collection complies with Executive Order 13126, Prohibition on Acquisition of Products Produced by Forced or Indentured Child Labor. Executive Order 13126 requires that this prohibition be enforced within the federal acquisition system by means of: (1) A provision that requires the contractor to certify to the contracting officer that the contractor or, in the case of an incorporated contractor, a

responsible official of the contractor has made a good faith effort to determine whether forced or indentured child labor was used to mine, produce, or manufacture any product furnished under the contract and that, on the basis of those efforts, the contractor is unaware of any such use of child labor; and (2) A provision that obligates the contractor to cooperate fully in providing reasonable access to the contractor's records, documents, persons, or premises if reasonably requested by authorized officials of the contracting agency, the Department of the Treasury, or the Department of Justice, for the purpose of determining whether forced or indentured child labor was used to mine, produce, or manufacture any product furnished under the contract.

The information collection requirements of the Executive Order are evidenced via the certification requirements delineated at FAR 22.1505, 52.212–3, 52.222–18, and 52.222–19.

To eliminate some of the administrative burden on offerors who must submit the same information to various contracting offices, the Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) decided to amend the Federal Acquisition Regulation (FAR) to require offerors to submit representations and certifications electronically via the Business Partner Network (BPN), unless certain exceptions apply. Online Representations and Certifications Application (ORCA) was the specific application on the BPN to replace the paper based Representations and Certifications process. The change to the FAR was accomplished by FAR Case 2002–024. The BPN and ORCA systems have now been incorporated into the System for Award Management, also known as SAM.

B. Annual Reporting Burden

To date, there are 355,531 active registrants in SAM. Those registrants are required to complete the Representations and Certifications section of SAM. Of the 355,531 active registrants in SAM, 949 registrants identified their business concern as one that may supply an end product that is on the list of products requiring contractor certification as to Forced or Indentured Child Labor, identified by their country of origin. The 949 registrants will be used as the basis for the number of respondents. This number represents an increase from what was published in the **Federal Register** at 76 FR 42709 on July 19,
