

record sources in this system than has been published in the **Federal Register**. Should the subsection be so interpreted, exemption from this provision is necessary to protect the sources of law enforcement and intelligence information and to protect the privacy and safety of witnesses and informants and others who provide information to the DOJ. Further, greater specificity of sources of properly classified records could compromise national security.

(7) From subsection (e)(5) because in the collection of information for authorized law enforcement and intelligence purposes, including efforts to detect, deter, and/or mitigate insider threats, due to the nature of investigations and intelligence collection, the DOJ often collects information that may not be immediately shown to be accurate, relevant, timely, and complete, although the DOJ takes reasonable steps to collect only the information necessary to support its mission and investigations. Additionally, the information may aid in establishing patterns of activity and providing criminal or intelligence leads. It could impede investigative progress if it were necessary to assure relevance, accuracy, timeliness and completeness of all information obtained throughout the course and within the scope of an investigation. Further, some of the records in this system may come from other domestic or foreign government entities, or private entities, and it would not be administratively feasible for the DOJ to vouch for the compliance of these agencies with this provision.
