

visibility to a building's energy use. Energy costs can be reduced by taking action to resolve problems identified by examining metered data. While metering systems do not directly improve energy efficiency, metering systems enable focused energy efficiency actions. It is estimated that the use of metering systems result in energy efficiency actions that deliver electricity energy savings of at least 2% or more annually. Today, the cost of building and panel level metering systems is typically a key hurdle to implementing these technologies.

Through the *Wireless Power Meter Challenge*, EERE is developing an aspirational but achievable performance specification for wireless metering devices at a low price point. The intent is to identify performance specifications that would meet the demand from the commercial building sector and leverage this demand to spur manufacturers to create new technologies. This model has been successfully deployed in the past through EERE's Roof Top Unit Challenge (RTU) in which DOE provided a similar performance specification that had not yet been offered on the market and manufacturers responded with compliant technologies, resulting in the most efficient products available on the market.

The *Wireless Power Meter Challenge Specification* is supported by the Building Technologies Office (BTO) Commercial Building Integration (CBI) team. In developing the draft *Specification*, EERE has considered input from Federal Agencies and individual comments from commercial building owners. This will be the first time EERE has issued a notice requesting general public comment on the *Specification*.

EERE is providing an opportunity for public comment on the technical provisions laid out in the *Specification*. EERE may give further consideration to certain technical elements and subsequently make changes to the *Specification* as a result of issues identified by commenters. The draft *Specification* is available at http://www1.eere.energy.gov/buildings/commercial/bba_wireless_metering.html.

DOE intends to host a webinar on April 30, 2013, to provide information on the development of the *Specification*. Interested parties should check the above Web page regularly for information regarding the webinar and Challenge, as it becomes available.

Issues on Which DOE Seeks Comment

DOE is seeking comments and views of interested parties on the following issues:

- The performance requirements laid out in the specification.
- The price targets laid out in the specification.
- The applicability of the performance requirements to various types of commercial buildings.
- The feasibility of developing a technology that meets the performance and price targets laid out in the specification.

Submission of Comments

DOE will accept comments, data, and information regarding the draft *Specification* no later than the date specified under the **DATES** heading.

Comments, data, and information submitted via DOE's email address should be provided in WordPerfect, Microsoft Word, PDF, or text (ASCII) file format. Interested parties should avoid the use of special characters or any form of encryption, and wherever possible, comments should include the electronic signature of the author. Comments, data, and information submitted to DOE via regular mail may include one signed paper original.

According to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit two copies: one copy of the document including all the information believed to be confidential, and one copy of the document that does not include the information believed to be confidential. DOE will make its own determination as to the confidential status of the information and treat it according to its determination.

Factors of interest to DOE when evaluating requests to treat submitted information as confidential include:

- (1) A description of the items;
- (2) Whether and why such items are customarily treated as confidential within the industry;
- (3) Whether the information is generally known by or available from other sources;
- (4) Whether the information has previously been made available to others without obligation concerning its confidentiality;
- (5) An explanation of the competitive injury to the submitting person which would result from public disclosure;
- (6) A date upon which such information might lose its confidential nature due to the passage of time; and
- (7) Why disclosure of the information would be contrary to the public interest.

Issued in Washington, DC, on March 29, 2013.

Kathleen B. Hogan,

Deputy Assistant Secretary, Energy Efficiency and Renewable Energy.

Agency Information Collection Activities OMB Responses

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This document announces the Office of Management and Budget (OMB) responses to Agency Clearance requests, in compliance with the Paperwork Reduction Act (44 U.S.C. 3501 et. seq.). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

FOR FURTHER INFORMATION CONTACT: Rick Westlund (202) 566-1682, or email at westlund.rick@epa.gov and please refer to the appropriate EPA Information Collection Request (ICR) Number.
