NUCLEAR REGULATORY COMMISSION

Workshop To Discuss What Is or Is Not Material to the Completion of Inspections, Tests, and Acceptance Criteria (ITAAC)

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of public workshop.

SUMMARY: The NRC needs to establish the basis for categorizing NRC inspection results during new reactor construction under 10 CFR part 52. In order to meet that goal, the NRC is holding a workshop to explore stakeholder views on what types of NRC inspection results could call into question the completion of the ITAAC for a particular certified reactor design.

SUPPLEMENTARY INFORMATION:

The Goal of the Workshop

The determination of whether a nuclear plant licensed under 10 CFR part 52 has been built in accordance with its design is dependent on the

satisfactory completion by the licensee of all the related ITAAC. This workshop is for the NRC to understand stakeholder views on why various NRC inspection results may or may not be material to the successful completion of ITAAC. Being "material to an ITAAC" means the satisfactory completion of an ITAAC may be called into question. The labels and groupings previously used to describe NRC construction inspection results may no longer be applicable. The NRC believes it should listen to and understand the views of all stakeholders before reaching a decision on the need for any new groupings and labels to describe NRC construction inspection results. The NRC has made the examples to be discussed during the workshop available electronically at the Commission's Public Document Room in Rockville, Maryland or from the Publicly Available Records (PARS) component Agencywide Document Access and Management System (ADAMS) (Accession ML050870507). ADAMS can be accessed via the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the public electronic reading room). All participants are encouraged to review the examples before the workshop and come prepared to discuss their own points of view.

Some of the potential topics for discussion could include the following:

- Various interpretations of the examples.
- The groupings of the examples based on materiality to ITAAC completion.
- The need for additional examples in order to capture all possible groupings.
- What makes a particular example material to ITAAC.
- The possible actions of both the NRC and a licensee for each grouping.
