These could include, but are not limited to, an extension of the days-at-sea leasing program, modifications to the default measures, modifications to existing Special Access Programs (SAPs) or additional SAPs, changes to permitting conditions, reviews of bycatch information, etc.

As a result of the extensive scope of this next management action, the Groundfish Committee will also meet to develop recommendations on the broad issues to be addressed in the next adjustment, identify the information that will be needed to support decisions on those issues, develop a timeline for the Committee's work, and may begin to identify specific measures that will be included.
