

The selected alternative will enable visitors to experience the park at an NPS developed and managed visitor center and at visitor focal areas owned and managed by the NPS and key partners. The NPS and the key partners will coordinate interpretive programs at these sites. Visitors will access the park via auto-touring routes and an extensive system of non-motorized trails that provide opportunities for interpretation and recreation, connect focal areas, and tie to communities and resources outside the park. The NPS and the key partners will develop a coordinated land protection plan focused on acquisition of cultural landscapes, sensitive natural resource areas, and lands providing connections between NPS and key partner properties. The NPS and the key partners will have formal agreements that define responsibilities for special projects, programs, events, and specific park operations.

This decision is the result of a public planning process that began in 2005. Between 2005 and 2008, prior to the release of the Draft GMP/EIS, NPS staff met with and briefed representatives from numerous agencies and organizations about the GMP and NPS's future plans Cedar Creek and Belle Grove NHP. Additional public involvement activities followed the release of the Draft GMP/EIS and a detailed analysis of public comments received and NPS responses are provided in Appendix F of the Final GMP/EIS.

SUPPLEMENTARY INFORMATION:

Title: Recreation Visitor Use Surveys.

Abstract: The Bureau of Reclamation is responsible for recreation development at all of its reservoirs.

Presently, there are 289 designated recreation areas on our lands within the 17 Western States. We must be able to respond to emerging trends, changes in the demographic profile of users, changing values, needs, wants and desires, and conflicts between user groups. Statistically valid and up-to-date data derived from the user is essential to developing and providing recreation programs relevant to today's visitor.

The required 60-day comment period for the Recreation Visitor Use Surveys was initiated by a notice published in the **Federal Register** on March 22, 2011 (76 FR 15997). One comment regarding the surveys was received on March 22, 2011. The comment suggested that the surveys are expensive, a waste of time, should not be conducted more often than every 5 years, or defunded and alleviated. However, implementation of the survey is in compliance with the Federal Lands Recreation Enhancement Act (REA), Public Law 108-447, enacted on December 8, 2004. The 11 surveys are each designed to enhance visitor satisfaction of Reclamation recreation areas and response to the surveys is completely voluntary.

Frequency: One time survey.

Respondents: Respondents to the surveys will be members of the public engaged in recreational activities on our lands. The surveys target people engaged in specific activities such as boating on a specific lake/river, or people camping at a developed campground. Visitors will primarily consist of local residents, people from large metropolitan areas in the vicinity of the lake/river, and visitors from out of state.

Estimated Total Number of Respondents: 6,141.

Estimated Number of Responses per Respondent: 1.0.

Estimated Total Number of Annual Responses: 6,141.

Estimated Total Annual Burden on Respondents: 2,044.
