

accumulated experience. The Department of Transportation (DOT) is the U.S. competent authority for radioactive material transportation matters. The U.S. Nuclear Regulatory Commission (NRC) provides technical support to DOT in this regard, particularly regarding Type B and other fissile transportation packages.

The IAEA recently initiated a review cycle for its regulations. This is a first step in the review cycle for the IAEA transport regulations, but it does not constitute a decision to revise the transport regulations. To assure opportunity for public participation in the international regulatory development process, DOT and NRC are soliciting comments and information pertaining to issues with the IAEA regulations.

The focus of this solicitation is to identify issues or concerns with SSR-6 (Rev. 1). SSR-6 (Rev. 1) can be found online at [https://www-pub.iaea.org/MTCD/Publications/PDF/PUB1798\\_web.pdf](https://www-pub.iaea.org/MTCD/Publications/PDF/PUB1798_web.pdf).

The IAEA requests that any proposal for a change in the transport regulations should demonstrate that the proposed change is:

- Required to ensure safety and to protect people, property, and the environment from harmful effects of ionizing radiation during the transport of radioactive material.
- Needed to define or redefine the level of protection of people, property, and the environment from harmful effects of ionizing radiation during the transport of radioactive material.
- Required for consistency within the Transport Regulations.
- Required as a result of advances in technology.
- Needed to improve implementation of the Transport Regulations.

The IAEA also requests that a submission of an identified problem in the regulations for which new text is not proposed should also demonstrate a clear link to the criteria outlined above. Comments and proposed changes should reference the particular paragraphs of concern in SSR-6 (Rev. 1).

This information, and any associated discussions, will assist DOT in examining the full range of views and alternatives as the agency develops proposals to be submitted to the IAEA for consideration. DOT has not yet fully harmonized its US regulations with the 2012 and 2018 editions of SSR-6. DOT will follow its normal rulemaking procedures in any action to harmonize requirements for domestic and international transportation of radioactive materials. This call for input

to the IAEA process is separate from any future or current domestic rulemakings.

## II. Public Participation

PHMSA and the NRC are jointly seeking comments on issues concerning requirements in SSR-6 (Rev. 1). The IAEA is considering revisions to the SSR-6 (Rev. 1) regulations as part of its periodic review cycle for a new edition. Proposals must be submitted in writing (electronic file in Microsoft Word format preferred).

DOT and NRC will review the proposed issues and identified problems. Proposed issues and identified problems from all Member States and International Organizations will be initially considered at an IAEA Transport Safety Standards Committee (TRANSSC) Meeting to be convened by IAEA on June 20–24, 2022, in Vienna, Austria. The subsequent meeting of TRANSSC, to be held in November 2022, will determine whether the aggregate of the accepted proposed changes amounts to a change in requirements that is important in terms of safety. If this is the case, a revision of the transport regulations will be initiated by the IAEA. If there is no safety imperative, the issues agreed upon will be considered during the next review cycle scheduled to start in 2023.

Issued in Washington, DC, on February 11, 2022.

**SUPPLEMENTARY INFORMATION:** Under the PRA (44 U.S.C. 3501-3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information that they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) to include agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of title 44 requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the OCC is publishing notice of the proposed collection of information set forth in this document.

Section 1473(p) of the Dodd-Frank Wall Street Reform and Consumer Protection Act<sup>1</sup> provides that if the Appraisal Subcommittee (ASC) of the Federal Financial Institutions Examination Council (FFIEC) determines, six months after enactment

of that section (*i.e.*, January 21, 2011), that no national hotline exists to receive complaints of non-compliance with appraisal independence standards and Uniform Standards of Professional Appraisal Practice (USPAP), then the ASC shall establish and operate such a hotline (ASC Hotline). The ASC Hotline shall include a toll-free telephone number and an email address. Section 1473(p) further directs the ASC to refer complaints received through the ASC Hotline to the appropriate government bodies for further action, which may include referrals to OCC, the Federal Reserve Board (Board), the Federal Deposit Insurance Corporation (FDIC), the National Credit Union Administration (NCUA), the Bureau of Consumer Financial Protection (CFPB), and state agencies. The ASC determined that a national appraisal hotline did not exist at a meeting held on January 12, 2011, and a notice of that determination was published in the **Federal Register** on January 28, 2011, (76 FR 5161). As a result, the ASC established a hotline to refer complaints to appropriate state and Federal regulators.

Representatives from the OCC, the Board, the FDIC, the NCUA (Agencies), and the CFPB met and established a process to facilitate the referral of complaints received through the ASC Hotline to the appropriate Federal financial institution regulatory agency or agencies. The Agencies developed the Interagency Appraisal Complaint Form to collect information necessary to take further action on the complaint. The CFPB incorporated the process into one of their existing systems.

The Interagency Appraisal Complaint Form was developed for use by those who wish to file a formal, written complaint that an entity subject to the jurisdiction of one or more of the

Agencies has failed to comply with the appraisal independence standards or USPAP. The Interagency Appraisal Complaint Form is designed to collect information necessary for the Agencies to take further action on a complaint from an appraiser, other individual, financial institution, or other entities. The Agencies use the information to take further action on the complaint to the extent the complaint relates to an issue within their jurisdiction.
