SUPPLEMENTARY INFORMATION:

I. Abstract

The Massachusetts Division of Marine Fisheries has been conducting an experimental fishery, referred to as the Raised Footrope Whiting Trawl Experimental Fishery (Raised Footrope Experiment), to allow trawlers to target whiting, red hake, dogfish and other small mesh species using a raised footrope trawl. The experiment was designed to assess the effectiveness of a raised footrope small mesh otter trawl in reducing bycatch of regulated multispecies. The proposed Framework Adjustment 35 to the Multispecies Fishery Management Plan will recommend that the Raised Footrope Experiment become a multispecies exempted fishery. The collection-of-information requirements are: (1) A request for a certificate to fish in the Raised Footrope Whiting Trawl Exemption; and (2) a notification of intention to withdraw from the Raised Footrope Whiting Trawl Exemption. Requests for a certificate identify the person, the vessel name, the permit number, and how long he/she intends to fish in the exemption area (no less than seven days but not more than four months).
