

and establishment of an associated Right-of-Way (ROW); relocation of a portion of the paved Rochester main access road ROW; realignment of the Stage IV haul road and construction of secondary access roads; relocation of existing power lines consistent with the proposed ROW realignments and HLP construction; relocation of the electrical building, core shed, and production well PW-2a; excavation of new borrow areas and construction of one new growth medium stockpile; installation of the Stage IV HLP conveyor system, associated load out points, ore stockpiles, maintenance road, and utility corridor, including process solutions and fresh water supply pipelines; and changes to closure activities for existing facilities including altering the open pit safety berm sizes; HLP interim fluid management plans; HLP cover designs; the installation of evaporation cells (E-Cells); and long-term draindown management.

The purpose of the public scoping process is to determine relevant issues that will influence the scope of the environmental analysis, including alternatives, and guide the process for developing the EIS. At present, the BLM has identified the following preliminary issues: (a) The potential to create acid rock drainage or heavy metals from mining activities, and ensuring that there is no degradation of waters of the state or undue or unnecessary degradation of public lands; (b) Potential impacts to wildlife habitat; and (c) Potential impacts to cultural sites.

The BLM will analyze a combination of proposed environmental measures and possible mitigation to eliminate or minimize any impacts associated with the proposed action. This could include the potential of identifying opportunities to apply mitigation hierarchy strategies for on-site, regional, and compensatory mitigation appropriate to the size of the proposal and management actions to achieve resource objectives.

The BLM will use NEPA public participation requirements to assist the agency in satisfying the public involvement requirements under Section 106 of the National Historic Preservation Act (NHPA) (16 U.S.C. 470(f)) pursuant to 36 CFR 800.2(d)(3). The information about historic and cultural resources within the area potentially affected by the proposed *Coeur Rochester Mine Plan of Operations Amendment 10* will assist the BLM in identifying and evaluating impacts to such resources in the context of both NEPA and Section 106 of the NHPA.

The BLM will consult with Indian tribes on a government-to-government basis in accordance with Executive Order 13175 and other policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources, will be given due consideration. Federal, State, and local agencies, along with tribes and stakeholders that may be interested in or affected by the proposed *Coeur Rochester Mine Plan of Operations Amendment 10* that the BLM is evaluating, are invited to participate in the scoping process and, if eligible, may request or be requested by the BLM to participate in the development of the environmental analysis as a cooperating agency.
