II. Discussion

The NRC is issuing for public comment draft plant-specific Supplement 23, Second Renewal, to the GEIS for License Renewal of Nuclear Plants, NUREG–1437, regarding the proposed subsequent renewal of Renewed Facility Operating License Nos. DPR–24 and DPR–27 for an additional 20 years of operation for Point Beach. Draft plant-specific Supplement 23, Second Renewal, to the GEIS includes the preliminary analysis that evaluates the environmental impacts of the proposed action and alternatives to the proposed action. Based on the NRC staff’s (i) review of the subsequent license renewal application, which includes the environmental report, supplemental documents, and the licensee’s responses to the NRC staff’s requests for additional information; (ii) consultation with Federal, State, Tribal, and local governmental agencies and consideration of input from other stakeholders; and (iii) independent review as documented in the assessments summarized in the draft SEIS, the NRC staff’s preliminary recommendation is that the adverse environmental impacts of subsequent license renewal for Point Beach are not so great that preserving the option of subsequent license renewal for energy-planning decisionmakers would be unreasonable.

Dated: November 3, 2021.

For the Nuclear Regulatory Commission.

Robert B. Elliott,

Chief, Environmental Review License Renewal Branch, Division of Rulemaking, Environmental, and Financial Support, Office of Nuclear Material Safety and Safeguards.
