To comply with the law, SSA conducts periodic quality review case analysis to assess the SSI program and payment accuracy. SSA uses Form

SSA-8508 to collect information on operating efficiency, quality of underlying policies, and the effect of incorrect payments. SSA also uses the data to determine a Federal payment accuracy rate, which is a performance measure for the agency's service delivery goals. Respondents are recipients of SSI payments.

3. Youth Transition Process Demonstration Evaluation Data Collection—0960–0687.

Background

The purpose of the Youth Transition Demonstration (YTD) project is to help young people with disabilities make the transition from school to work. While participating in the project, youth can continue to work and/or continue their education because SSA waives certain disability program rules and offers services to youth who are receiving disability benefits or have a high probability of receiving them. We will fully implement YTD projects in 10 sites across the country. As part of the project, we will conduct an evaluation that will produce empirical evidence on the effects of the waivers and project services including educational attainment, employment, earnings, and receipt of benefits by youth with

disabilities, but also on the Social Security Trust Fund and Federal income tax revenues. This type of project is authorized by Sections 1110 and 234 of the Social Security Act.

Project Description

Given the importance of estimating YTD effects as accurately as possible, we will evaluate the project using rigorous analytic methods based on randomly assigning youth to a treatment

or control group. We will conduct several data collections. These include: (1) Baseline interviews with youth and their parents or guardians prior to random assignment; (2) followup interviews at 12 and 36 months after random assignment; (3) interviews and/ or roundtable discussions with local program administrators, program supervisors, and service delivery staff; and (4) focus groups of youths, their parents, and service providers. The respondents are youths with disabilities enrolled in the project; their parents or guardians; program staff; and service providers.

Type of Request: Revision of an existing OMB Clearance.

4. Waiver of Supplemental Security Income Payment Continuation—20 CFR 416.1400-416.1422-0960-NEW. An SSI claimant receiving payment during the appeals process has the option of waiving or stopping the payments until a decision is made on their claim. The claimant uses Form SSA-263-U2 to make the request. SSA uses the information on this form as proof that the individual does not want to continue to receive payments until a decision is made on their appeal and that they understand their due process rights. The respondents are SSI recipients.

Type of Request: Existing Information Collection in Use without an OMB Number.

Number of Respondents: 3,000. Frequency of Response: 1. Average Burden per Response: 5 inutes.

Estimated Annual Burden: 250 hours.

Dated: August 18, 2008.
