k. This application has been accepted for filing and is now ready for environmental analysis.

1. *The existing Upper Mechanicville Hydroelectric Project consists of:* (1) A 700-foot-long concrete gravity dam with a crest elevation of 66.6 feet National Geodetic Vertical Datum of 1929 (NGVD29); (2) 3 spillway bays each extending 222 feet across the length of the dam and separated by a 7.5-foot to 10.5-foot-wide concrete pier, with each spillway bay containing 12 pneumatic Obermeyer crest gates that are 6 feet high; (3) a 1.8-mile-long impoundment with a 380-acre surface area and gross storage capacity of 10,735 acre-feet at a normal pool elevation of 72.6 feet

NGVD29; (4) an intake channel with two reinforced guide walls and three 35-foot-diameter cofferdam walls constructed of sheet piling; (5) a 20-foot-wide and 7.5-foot-high intake bypass sluice gate; (6) a 105.5-foot-long by 122-foot-wide powerhouse containing two 12,780 horsepower Kaplan turbines and two Siemens-Allis generators each having a rated capacity of 8,265 kilowatts; (7) a tailrace approximately 1,200 feet long and 120 feet wide with a bi-level bottom designed to minimize cross-currents; (8) one 1.10-mile-long, 34.5-kilovolt transmission line; and (9) appurtenant facilities.

During the non-navigation season (typically from December 1 through April 30), NYSEG operates the project in a run-of-river (ROR) mode and maintains the impoundment at an elevation of 72.6 feet NGVD29. During the navigation season (typically May 1 through November 30), NYSEG periodically spills water to lower the impoundment up to 3 feet below full pool, as directed by the New York State Canal Corporation, to accommodate navigation at lock C-3, and uses all available remaining inflow (that is not used to support navigation) for generation purposes. NYSEG proposes to continue operating the project as it does currently, to support both generation and navigation. In addition, NYSEG proposes to enhance fish passage at the project by: (1) Installing upstream passage for American eel (4 years post-license); (2) developing an agreement with the New York State Canal Corporation to modify lock operations to accommodate the upstream passage of blueback herring and American shad (commencing 2 years post-license); and (3) modifying the project's intake bypass sluice gate to provide an additional route of downstream fish passage from April 1 through November 30. The project currently generates an annual average of 88,537 megawatt-hours.

[Docket No. OR20-4-000]

Phillips 66 Pipeline LLC; Notice of Request for Emergency Relief

Take notice that on November 27, 2019, NGL Supply Wholesale, LLC (NGL) filed a request for the Commission to exercise its emergency

powers pursuant to Section 1(15) of the Interstate Commerce Act (ICA), to allow, or if necessary direct, Phillips 66 Pipeline LLC (Phillips 66 Pipeline) to temporarily provide priority treatment of propane shipments to Jefferson City, Missouri and East St. Louis, Illinois. NGL submits that early weather conditions requiring propane for heating and high moisture grain requiring propane for crop drying have driven demand for propane by NGL's customers. Specifically, NGL requests that the Commission direct Phillips 66 Pipeline to prioritize the transportation of propane over butane in its Blue Line to maximize the volume of propane for thirty days from the date of a Commission order, subject to further extensions if the conditions continue.

Notice is given that the deadline pursuant to 18 CFR 343.3 for filing comments is hereby shortened to and including December 6, 2019.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the eFiling link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.
