

performance measures. HRSA developed separate performance measures for RCORP's new Overdose Response, Behavioral Health, and Neonatal Abstinence Syndrome grants and seeks OMB approval for the new performance measures.

Need and Proposed Use of the Information: Due to the growth in the number of grant initiatives included within RCORP, as well as emerging SUD and other behavioral health trends in rural communities, HRSA is submitting a revised ICR that includes measures for RCORP's new Overdose Response, Child and Adolescent Behavioral Health, and Neonatal Abstinence Syndrome grants.

For this program, performance measures were developed to provide data on each RCORP initiative and to enable HRSA to provide aggregate program data required by Congress under the Government Performance and

Results Act of 1993. These measures cover the principal topic areas of interest to HRSA's Federal Office of Rural Health Policy, including: (a) provision of, and referral to, rural behavioral health care services, including SUD prevention, treatment and recovery support services; (b) behavioral health care, including SUD prevention, treatment, and recovery, process and outcomes; (c) education of health care providers and community members; (d) emerging trends in rural behavioral health care needs and areas of concern; and (e) consortium strength and sustainability. All measures will speak to the progress on meeting the set goals of the Federal Office of Rural Health Policy.

Likely Respondents: The respondents will be the recipients of the RCORP grants.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
RCORP—Implementation	290	2	580	1.24	719.20
RCORP—Psychostimulant Support	15	1	15	1.30	19.50
RCORP—Medication Assisted Treatment Access	11	1	11	1.95	21.45
RCORP—Behavioral Health Care Support	58	1	58	2.02	117.16
Rural Communities Opioid Response—Overdose Response (NEW)	47	3	141	0.56	78.96
RCORP—Child and Adolescent Behavioral Health (NEW)	9	2	18	0.48	8.64
RCORP—Neonatal Abstinence Syndrome (NEW)	41	4	164	2.31	378.84
Total	471	987	1,343.75

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Maria G. Button,

Director, Executive Secretariat.
