

operate CMVs in interstate commerce.¹ The revision must provide for individual assessment of drivers with diabetes mellitus, and be consistent with the criteria described in section 4018 of TEA-21.

Section 4129 requires two substantive changes to be made in the current exemption process set out in the September 3, 2003 Notice. As required by section 4129(b) and (c), the changes are: (1) Elimination of the requirement for three years of experience operating CMVs while being treated with insulin; and (2) establishment of a specified minimum period of insulin dose to demonstrate stable control of diabetes before being allowed to operate a CMV.

In order to accomplish these changes within the 90-day time frame established by section 4129, FMCSA made immediate revisions to the diabetes exemption program established by the September 3, 2003 Notice. These revisions were those necessary to respond to the specific changes mandated by section 4129 while continuing to ensure that operation of CMVs by drivers with ITDM will achieve the necessary level of safety as also required by section 4129(a).

Section 4129(d) also directed FMCSA to ensure that drivers of CMVs with ITDM are not held to a higher standard than other drivers, with the exception of limited operating, monitoring and medical requirements that are deemed medically necessary. FMCSA concluded that all of the operating, monitoring and medical requirements set out in the September 3, 2003 Notice, except as modified, were in compliance with section 4129(d). All of the requirements set out in the September 3, 2003 Notice, except as modified in the Notice in the **Federal Register** on November 8, 2005 (70 FR 67777), remain in effect.

Issued on: December 13, 2005.

As a condition to this exemption, any employees affected by the acquisition of the temporary trackage rights will be protected by the conditions imposed in *Norfolk and Western Ry.
