

collections will allow for ongoing, collaborative, and actionable communications between CIGIE and its stakeholders and the public. It will also allow feedback to contribute directly to the improvement of program management.

The solicitation of feedback will target areas such as: timeliness, appropriateness, accuracy of information, courtesy, efficiency of information delivery, and resolution of issues. Responses will be assessed to plan and inform efforts to improve or maintain the quality of CIGIE's websites. If this information is not collected, vital feedback from users and stakeholders of CIGIE's websites will be unavailable.

CIGIE will only submit a collection for approval under this generic clearance if it meets the following conditions:

The collections are voluntary;

The collections are low-burden for respondents (based on considerations of total burden hours, total number of respondents, or burden-hours per respondent) and are low-cost for both the respondents and the Federal Government;

The collections are non-controversial and do not raise issues of concern to other Federal agencies;

Any collection is targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future;

Personally identifiable information (PII) is collected only to the extent necessary and is not retained;

Information gathered will be used only internally for general service improvement and program management purposes and is not intended for release outside of the agency;

Information gathered will not be used for the purpose of substantially informing influential policy decisions; and

Information gathered will yield qualitative information; the collections will not be designed or expected to yield statistically reliable results or used as though the results are generalizable to the population of study.

Feedback collected under this generic clearance provides useful information, but it does not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: the target population to which

generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study.

As a general matter, information collections will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

Current Action: Request for approval for a collection of information.

Type of Review: Initial approval.

Affected Public: Individuals, households, professionals, public/private sector.

Annual Reporting Burden:

Estimated Number of Respondents: 20,000.

Responses per Respondent: 1.

Estimated Total Annual Responses: 20,000.

Estimated Average Hours per Response: 4 minutes.

Estimated Total Burden Hours: 666 hours.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose, or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing

and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

I. Background

DoD is establishing the “DoD Historical Records,” DoD–0014 as a DoD-wide Privacy Act system of records. A DoD-wide system of records notice (SORN) supports multiple DoD paper or electronic recordkeeping systems operated by more than one DoD component that maintain the same kind of information about individuals for the same purpose. Establishment of DoD-wide SORNs helps DoD standardize the rules governing the collection, maintenance, use, and sharing of personal information in key areas across the enterprise. DoD-wide SORNs also reduce duplicative and overlapping SORNs published by separate DoD components. The creation of DoD-wide SORNs is expected to make locating relevant SORNs easier for DoD personnel and the public, and create efficiencies in the operation of the DoD privacy program.

The mission of the DoD History Program is to collect, preserve, and present the history of the Department of Defense, in order to support Agency leadership and inform the American public. To further this mission, the Department is authorized to gather individuals’ information to prepare and publish historical reports, provide historically relevant information on advisory panels and commissions, organize historical presentations and prepare historical studies. The DoD Historical Records SORN contains information on DoD civilian employees, uniformed service members,

contractors, and other DoD-affiliated individuals. The system of records contains data derived from government records (Federal, state, and local), information collected directly from individuals, international government and non-government organizations, and publicly available information.

Additionally, DoD is issuing a Direct Final Rule to exempt this system of records from certain provisions of the Privacy Act elsewhere in today’s issue of the **Federal Register**. DoD SORNs have been published in the **Federal Register** and are available from the address in FOR FURTHER INFORMATION CONTACT or at the Defense Privacy, Civil Liberties, and Freedom of Information Directorate website at <https://dpcltd.defense.gov>.

II. Privacy Act

Under the Privacy Act, a “system of records” is a group of records under the control of an agency from which information is retrieved by the name of an individual or by some identifying -number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined as a U.S. citizen or lawful permanent resident.

In accordance with 5 U.S.C. 552a(r) and Office of Management and Budget (OMB) Circular No. A–108, DoD has provided a report of this system of records to the OMB and to Congress.
