

proposals include new special use airspace in Southern California, an expansion of an underwater training range near San Clemente Island, and installation and maintenance of mine training areas off Hawaii and California.

Environmental resources that are determined to be potentially affected are carried forward for full analysis. Resources to be evaluated include, but are not limited to, biological resources (including marine mammals, reptiles, fishes, vegetation, invertebrates, habitats, birds, and other protected species), sediments and water quality, air quality, cultural resources, socioeconomic resources, and public health and safety. The EIS/OEIS will also analyze measures that would avoid, minimize, or mitigate environmental effects. The Navy will conduct all coordination and consultation activities required by the Marine Mammal Protection Act (MMPA), NHPA, Endangered Species Act (ESA), National Marine Sanctuaries Act, Magnuson-Stevens Fishery Conservation and Management Act, Clean Water Act, Rivers and Harbor Act, Coastal Zone Management Act, Clean Air Act, and other laws and regulations determined to be applicable to the project. As part of this process, the DoN will seek the issuance of regulatory permits and authorizations under MMPA and ESA to support at-sea mission readiness activities within the Study Area, beginning in December 2025.

Pursuant to 40 CFR 1501.8, the DoN invited the National Marine Fisheries Service and the Federal Aviation Administration to be cooperating agencies in preparation of the EIS/OEIS.

The scoping process invites comments on the scope of the EIS/OEIS including identification of potential alternatives, information and analyses relevant to the Proposed Action, identification of environmental concerns, issues the public would like to see addressed in the EIS/OEIS, and the projects potential to affect historic properties pursuant to Section 106 of the NHPA. Parties with demonstrated interest in the undertaking and its effects on historic properties may request to become a consulting party in the section 106 process. Federal agencies, State agencies, local agencies, Native American Indian Tribes and Nations, Native Hawaiian Organizations, the public, and interested persons are encouraged to provide comments.

Comments must be postmarked or submitted electronically via the website no later than 11:59 p.m. Pacific time on January 29, 2024 for consideration during the development of the Draft

EIS/OEIS. Comments can be submitted electronically via the project website at <http://www.nepa.navy.mil/hctteis> or mailed to the address noted above.

After the scoping period, DoN will coordinate with participating and cooperating agencies to develop a Draft EIS/OEIS. The DoN intends to release the Draft EIS/OEIS in the fall of 2024, release the Final EIS/OEIS in the fall of 2025, and sign a Record of Decision following the 30-day Final EIS/OEIS wait period.

As an interim (usually annual) performance report, ED uses the information submitted by grantees in the ED 524B to evaluate grantee performance and progress and to

determine whether non-competing continuation funds should be awarded in multi-year grants. Only grantees that can demonstrate that they are making substantial progress (or, if not, have submitted an acceptable plan for meeting their objectives in subsequent budget periods) are eligible for continuation funding.

ED uses the information submitted on the ED 524B as a final performance report to determine whether grantees whose projects have ended have achieved project objectives and met or exceeded the Government Performance and Results Act and/or other program performance measures and grant requirements. FEDERAL ENERGY REGULATORY COMMISSION

[Project No. 8615–047]

Fiske Hydro, Inc.; Notice Soliciting Pre-Application Documents and Notices of Intent To File a Subsequent License Application

On November 30, 2020, Fiske Hydro, Inc. (Fiske Hydro), the current licensee for the Fiske Mill Hydroelectric Project No. 8615 (project), filed a Notice of Intent (NOI) to file an application for an

exemption from licensing for the project.¹ The existing license for the project expires on November 30, 2025.² On September 20, 2023, Fiske Hydro filed an application to surrender its license for the project.³

Pursuant to section 16.20 of the Commission's regulations, an existing licensee with a minor license not subject to sections 14 and 15 of the Federal Power Act must file an application for a subsequent license or exemption at least 24 months prior to the expiration of the current license, which with respect to the Fiske Mill Project, was November 30, 2023.⁴

Pursuant to section 16.25(a) of the Commission's regulations, when an existing licensee, having previously filed an NOI to file an application for an exemption subsequently does not file an application, the Commission must solicit applications from potential applicants other than the existing licensee.⁵ Any party interested in filing an application for the project must file an NOI document within 90 days from the date of this notice.⁶ In addition, NOIs for a subsequent license must also include a pre-application document (PAD). Moreover, while the integrated licensing process is the default process for preparing an application for a subsequent license, a potential applicant for a subsequent license may include with the NOI and PAD a request to use alternative licensing procedures.⁷ An application for the Fiske Mill Hydroelectric Project No. 8615 must be filed within 18 months of the date of filing the NOI.

Questions concerning the process for filing an NOI should be directed to Robert Haltner at 202–502–8612 or robert.haltner@ferc.gov.
