SUPPLEMENTARY INFORMATION:

I. Abstract

Owners of vessels that fish for tuna in the eastern Pacific Ocean (bounded by the coast of the Americas, 40° N. lat., 40° S. lat., and 150° W. long.) were required to submit information about their fishing vessels in 2000 so that the United States could provide information for a vessel register being compiled under the terms of an Inter-American Tropical Tuna Commission (IATTC) recommendation approved by the Department of State under the Tuna Conventions Act. The National Marine Fisheries Service used existing sources of information to obtain most of the information needed, but vessel owners were required to provide some information as well as a picture of the vessel with its registration number showing. The vessel register is needed to support uniform monitoring of compliance with IATTC conservation and management recommendations that are implemented by member governments, including the United States. Once the initial information was provided, the only reporting requirement was to report changes in vessel characteristics, ownership or other information on the form. It is estimated that no more than 30 vessel owners would be subject to this requirement in any year. In addition, it is estimated that 20 reports will be needed annually for new vessels to be placed on the register.

II. Method of Collection

Paper forms and pictures are submitted.
