

These reviews are not considered audits but are intended to be assistive in nature; aiding the Recipient in following good practices where appropriate and bringing them into compliance, if needed. A team of BSR participants is assembled to assess the Recipient's policies, procedures, and practices to determine whether, taken collectively, these administrative business systems used in managing the Facility meet NSF award expectations and comply with Federal regulations.

The BSR Guide is designed for use by both our customer community and NSF staff for guidance in executing these reviews. The BSR Guide defines the overall framework and structure and summarizes the details outlined in the internal operating guidelines and procedures used by BSR Participants to execute the review process.

Management principles and practices are specified for seven core functional areas (CFA) and are used by BSR participants in performing these evaluations. Roles and responsibilities of the NSF stakeholders involved in the process are outlined in the BSR Guide as well as the expectations of the Recipient.

This version of the Business Systems Guide aligns with the Uniform Guidance and the *NSF Research Infrastructure Guide*. This Guide will be updated periodically to reflect changes in requirements, policies and/or procedures. Award Recipients are expected to monitor and adopt the requirements and good practices included in the Guide.

The submission of Award Recipient and Project administrative business process and procedural documentation used in support of operations of the Major Facilities is part of the collection of information. This information is used to help NSF fulfill this responsibility in supporting merit-based research and education projects in all the scientific and engineering disciplines. The Foundation also has a continuing commitment to provide oversight on facilities through their full life cycle which must be balanced against monitoring its information collection so as to identify and address any excessive review and reporting burdens.

NSF has approximately twenty (20) Major Facilities in various stages of design, construction, operations, and divestment. The need for a BSR and review scope is based on NSF's internal annual Major Facility Portfolio Risk Assessment and the assessment of various risks factors.

Burden on the Public: The Foundation estimates that approximately one and half (1.5) Full Time Equivalents (FTEs)

are necessary for a major facility to respond to the requirements of a BSR; or 3,120 hours. With an average of four (4) BSRs conducted a year, this equates to roughly 12,480 public burden hours annually.

Dated: July 22, 2022.

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request

AGENCY: National Science Foundation.

ACTION: Submission for OMB review; comment request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995. This is the second notice for public comment; the first was published in the **Federal Register**, and no comments were received. NSF is forwarding the proposed submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314, or send email to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays).

Copies of the submission may be obtained by calling 703–292–7556. NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number, and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information

unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

Title of Collection: Research Performance Progress Report.

OMB Approval Number: 3145–0221.

Expiration Date of Approval: July 30, 2022.

Type of Request: Intent to seek approval to extend an information collection for three years.

Use of the Information:

NSF developed the RPPR as a service within *Research.gov*. The service provides a common portal for the research community to manage and submit annual project reports to the National Science Foundation (NSF) and to partner agencies. This service replaced NSF's annual and interim project reporting capabilities which resided in the FastLane System.

Complete information about NSF's implementation of the Research Performance Progress Report (RPPR) may be found at the following website: <http://www.nsf.gov/bfa/dias/policy/rppr/index.jsp>.

Burden on the Public: The Foundation estimates that an average of 6.6 hours is expended for each report submitted. An estimated 120,000 reports are expected during the course of one year for a total of 30,000 public burden hours annually.

Dated: July 25, 2022.

Suzanne H. Plimpton,
Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 030–38679–LA; ASLBP No. 21–972–01–LA–BD01]

Cammenga and Associates, LLC (Denial of License Amendment Requests); Notice of Atomic Safety and Licensing Board Reconstitution

Pursuant to 10 CFR 2.313(c) and 2.321(b), the Atomic Safety and Licensing Board in the above-captioned *Cammenga and Associates, LLC* proceeding is hereby reconstituted as follows: Administrative Judge G. Paul Bollwerk, III, is designated to serve as Chairman in place of Administrative Judge Ronald M. Spritzer, who is retiring on July 30, 2022.¹

All correspondence, documents, and other materials shall continue to be filed

¹ Judge Spritzer served with distinction on the Atomic Safety and Licensing Board Panel for over fourteen years, having been appointed as a full-time Administrative Judge in March 2008.
