Needs and Uses: The Commission is submitting this information collection to the Office of Management and Budget (OMB) for approval of a revision. The revision is adding one additional rule section which is 90.187 to this information collection.

On April 18, 2013, the Commission in a Fifth Report and Order, FCC 13-52, adopted changes to 47 CFR 90.425 of the Commission's rules to allow Private Land Mobile Radio (PLMR) licensees in the bands between 150 and 512 MHz that are licensed on an exclusive basis to transmit station identification information in digital format, on the condition that the licensee will provide the Commission with information sufficient to decode the digital transmission to ascertain the call sign transmitted. However, this gives a new group of licensee stations (PLMRs) an option regarding the method of transmission of required call sign information; it modifies the existing burden, and slightly increases the cost burden—specifically the cost associated with providing the Commission sufficient information to decode the transmission—unless they choose the digital transmission option.

The information requested in this collection is used by the Commission's staff to enable the Commission to evaluate the accuracy of frequency coordination pursuant to its rule under 47 CFR 90.187, 90.425 and 90.647.

Federal Communications Commission.

Secretary, Office of the Secretary, Office of Managing Director.
