SUPPLEMENTARY INFORMATION:

Title of Collection: Evaluation of the National Science Foundation's (NSF) Broader Impacts Review Criterion.

OMB Number: 3145-NEW.

Type of Request: New information collection.

Description: NSF is conducting an evaluation to assess (1) how NSF's Broader Impacts review criterion is applied across the Foundation and (2) its effectiveness in meeting the goals established in section 526 of the America Creating Opportunities to Meaningfully Promote Excellence in Technology, Education, and Science Reauthorization Act of 2010 (42 U.S.C. 1862p-14) (America COMPETES Reauthorization Act of 2010). This evaluation is congressionally directed in section 10341 of the Creating Helpful Incentives to Produce Semiconductors [CHIPS] for America Fund Act 2022. As part of the evaluation, NSF is conducting a literature review, document analysis, extant data analysis, interviews with NSF staff, and focus groups with NSF principal investigators (PIs) and reviewers. NSF will map findings from the evaluation activities to current NSF policies and practices to identify strategies for improving how NSF applies the review criterion.

The subject of this request is related to the planned focus groups with PIs and reviewers. The focus groups will answer the following research questions (RQs):

- RQ1. In what ways do the interpretations of the Broader Impacts review criterion among PIs and reviewers vary, and what factors might contribute to these variations?

- RQ2. How do external reviewers assess the Broader Impact review criterion?

- RQ3. In what ways do PIs and reviewers perceive that variations in interpretation and assessment can advance or hinder the merit review of proposals?

Findings from the focus groups described in this request will be used to inform interpretation of other evaluation
