

required to do so, the Agency would voluntarily perform the RFA's small-entity impact analysis. *Id.* EPA explained the strong public interest in the Agency following the RFA's requirements on a voluntary basis: "[The notice and comment] process also provides an opportunity for EPA to consider the potential impact of general permit terms on small entities and how to craft the permit to avoid any undue burden on small entities." *Id.* Accordingly, with respect to the NPDES permit that EPA was addressing in that **Federal Register** notice, EPA stated that "the Agency has considered and addressed the potential impact of the general permit on small entities in a manner that would meet the requirements of the RFA if it applied." *Id.*

Subsequent to EPA's conclusion in 1998 that general permits are adjudications rather than rules, as noted above, the DC Circuit recently held that Nationwide general permits under section 404 are "rules" rather than "adjudications." Thus, this legal question remains "a difficult one" (*supra*). However, EPA continues to believe that there is a strong public policy interest in EPA applying the RFA's framework and requirements to the Agency's evaluation and consideration of the nature and extent of any economic impacts that a CWA general permit could have on small entities (e.g., small businesses). In this regard, EPA believes that the Agency's evaluation of the potential economic impact that a general permit would have on small entities, consistent with the RFA framework discussed below, is relevant to, and an essential component of, the Agency's assessment of whether a CWA general permit would place requirements on dischargers that are appropriate and reasonable. Furthermore, EPA believes that the RFA's framework and requirements provide the Agency with the best approach for the Agency's evaluation of the economic impact of general permits on small entities. While using the RFA framework to inform its assessment of whether permit requirements are appropriate and reasonable, EPA will also continue to ensure that all permits satisfy the requirements of the Clean Water Act.

Accordingly, EPA has committed to operating in accordance with the RFA's framework and requirements during the Agency's issuance of CWA general permits (in other words, the Agency has committed that it will apply the RFA in its issuance of general permits as if those permits do qualify as "rules" that are subject to the RFA). In satisfaction

of this commitment, during the course of this CGP proceeding, the Agency conducted the analysis and made the appropriate determinations that are called for by the RFA. In addition, and in satisfaction of the Agency's commitment, EPA will apply the RFA's framework and requirements in any future issuance of other NPDES general permits. EPA anticipates that for most general permits the Agency will be able to conclude that there is not a significant economic impact on a substantial number of small entities. In such cases, the requirements of the RFA framework are fulfilled by including a statement to this effect in the permit fact sheet, along with a statement providing the factual basis for the conclusion. A quantitative analysis of impacts would only be required for permits that may affect a substantial number of small entities, consistent with EPA guidance regarding RFA certification.¹

B. Application of RFA Framework to Issuance of 2008 CGP

EPA has concluded, consistent with the discussion in Section IV.A above, that the issuance of the 2008 CGP could affect a substantial number of small entities. In the areas where the CGP is effective (see Section III.A), an estimated 4,000 construction projects per year were authorized under the 2003 CGP, a substantial number of which could be operated by small entities. However, EPA has concluded that the issuance of the 2008 CGP is unlikely to have an adverse economic impact on small entities. The 2008 CGP includes substantially the same requirements as those of the 2003 CGP. EPA intends to include an updated economic screening analysis with the issuance of the next CGP. EPA concludes that this action will not have a significant economic impact on a substantial number of small entities.

Authority: Clean Water Act, 33 U.S.C. 1251 *et seq.*

¹ EPA's current guidance, entitled Final Guidance for EPA Rulewriters: Regulatory Flexibility Act as Amended by the Small Business Regulatory Enforcement and Fairness Act, was issued in November 2006 and is available on EPA's Web site: <http://www.epa.gov/sbrefa/documents/rfafinalguidance06.pdf>. After considering the Guidance and the purpose of CWA general permits, EPA concludes that general permits affecting less than 100 small entities do not have a significant economic impact on a substantial number of small entities.

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Approved by the Office of Management and Budget

July 8, 2008.

SUMMARY: The Federal Communications Commission has received Office of Management and Budget (OMB) approval for the following public information collection(s) pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520). An agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number, and no person is required to respond to a collection of information unless it displays a currently valid OMB control number. Comments concerning the accuracy of the burden estimate(s) and any suggestions for reducing the burden should be directed to the person listed in the **FOR FURTHER INFORMATION CONTACT** section below.

FOR FURTHER INFORMATION CONTACT: For additional information contact Cathy Williams, Performance and Evaluation Records Management Division, Office of the Managing Director, at (202) 418-2918 or at Cathy.Williams@fcc.gov.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0009.

OMB Approval Date: June 23, 2008.

Expiration Date: June 30, 2011.

Title: Application for Consent to Assignment of Broadcast Station Construction Permit or License or Transfer of Control of Corporation Holding Broadcast Station Construction Permit or License.

Form Number: FCC Form 316.

Estimated Annual Burden: 750 responses; 1–4 hours per response; 855 hours total per year.

Annual Cost Burden: \$425,150.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in 154(i) and 310(d) of the Communications Act of 1934, as amended.

Nature and Extent of Confidentiality: There is no need for confidentiality.

Needs and Uses: On March 17, 2005, the Commission released a Second Order on Reconsideration and Further Notice of Proposed Rulemaking, Creation of a Low Power Radio Service, MB Docket No. 99–25 (FCC 05–75). The Further Notice of Proposed Rulemaking (“FNPRM”) proposed to permit the assignment or transfer of control of Low Power FM (LPFM) authorizations where there is a change in the governing board of the permittee or licensee or in other situations corresponding to the circumstances described above. This proposed rule was subsequently adopted in a Third Report and Order and Second Further Notice of Proposed Rulemaking, MB Docket No. 99–25 (FCC 07–204) (Third Report and Order), released on December 11, 2007.

FCC Form 316 has been revised to encompass the assignment and transfer of control of LPFM authorizations, as proposed in the FNPRM and subsequently adopted in the Third Report and Order, and to reflect the ownership and eligibility restrictions applicable to LPFM permittees and licensees. Filing of the FCC Form 316 is required when applying for authority for assignment of a broadcast station construction permit or license, or for consent to transfer control of a corporation holding a broadcast station construction permit or license where there is little change in the relative interest or disposition of its interests; where transfer of interest is not a controlling one; there is no substantial change in the beneficial ownership of the corporation; where the assignment is less than a controlling interest in a partnership; where there is an appointment of an entity qualified to succeed to the interest of a deceased or legally incapacitated individual permittee, licensee or controlling stockholder; and, in the case of LPFM

stations, where there is a voluntary transfer of a controlling interest in the licensee or permittee entity. In addition, the applicant must notify the Commission when an approved transfer of control of a broadcast station construction permit or license has been consummated.

OMB Control Number: 3060–0920.

OMB Approval Date: June 23, 2008.

Expiration Date: June 30, 2011.

Title: Application for Construction Permit for a Low Power FM Broadcast Station.

Form Number: FCC Form 318.

Estimated Annual Burden: 23,377 responses; 0.0025–12 hours per response; 34,396 hours total per year.

Annual Cost Burden: \$23,850.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in 154(i), 303, 308 and 325(a) of the Communications Act of 1934, as amended.

Nature and Extent of Confidentiality: There is no need for confidentiality.

Needs and Uses: On December 11, 2007, the FCC released a Third Report and Order and Second Further Notice of Proposed Rulemaking, Creation of a Low Power Radio Service, MM Docket No. 99–25, FCC 07–204. In the Third Report and Order, the FCC extended the local standards for rural markets. Under the old Rules, an LPFM applicant was deemed local if it was physically headquartered or had a campus within ten miles of the proposed LPFM transmitter site, or if 75 percent of its board members resided within ten miles of the proposed LPFM transmitter site. The Third Report and Order modified the ten-mile requirement to twenty miles for all LPFM applicants for proposed facilities in other than the top fifty urban markets, for both the distance from transmitter and residence of board member standards. We have revised the Form 318 to reflect this extension of local standards for rural markets. While the overall number of respondents increases because the Rule change expands the universe of eligible applicants, there are no new information collection requirements with respect to completion of the Form 318.

In the Third Report and Order, the Commission also delegated to the Media Bureau the authority to consider Section 73.807 waiver requests from certain LPFM stations. When implementation of a full-service station community of license modification would result in an increase in interference caused to the LPFM station or its displacement, the LPFM station may seek a second-

adjacent channel short spacing waiver in connection with an application proposing operations on a new channel.

The Third Report and Order also allows LPFM stations to file waiver requests of Section 73.809 of the Rules if: (1) it is at risk of displacement by an encroaching full-service station modification application and no alternative channel is available, and (2) it can demonstrate that it has regularly provided at least eight hours per day of locally originated programming. LPFM stations that wish to make a showing under this waiver standard must file an informal objection to the “encroaching” community of license modification application.

FCC Form 318 is required: (1) To apply for a construction permit for a new Low Power FM (LPFM) station; (2) to make changes in the existing facilities of such a station; or (3) to amend a pending FCC Form 318 application.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirement Submitted to OMB for Review and Approval, Comments Requested

July 8, 2008.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden, invites the general public and other Federal agencies to take this opportunity to comment on the following information collection, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (b) the accuracy of the Commission’s burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents,
