For registration, contact Lorri Hamn at the same address, telephone (202) 366-9896, facsimile (202) 493-2266, electronic mail "lhamn@nhtsa.dot.gov".

SUPPLEMENTARY INFORMATION: On April 8, 2005, NHTSA published a final rule establishing Federal Motor Vehicle Safety Standard (FMVSS) No. 138, *Tire Pressure Monitoring Systems* (70 FR 18136). This final rule requires new

passenger cars, multi-purpose passenger vehicles, trucks, and buses with a gross vehicle weight rating of 4,536 kg (10,000 pounds) or less, except those with dual wheels on an axle, to be equipped with a TPMS to alert the driver when one or more of the vehicle's tires, up to a total of all four tires, is significantly under-inflated. Specifically, the TPMS must be capable of detecting when the pressure in one or more of the vehicle's tires is 25 percent or more below the vehicle manufacturer's recommended cold inflation pressure or a minimum activation pressure specified in the standard, whichever is higher. As reflected in the final rule, FMVSS No. 138 is a performance standard. Petitions for reconsideration of the final rule have been received and may be viewed on DOT Web site <http://dms.dot.gov>, (reference docket number NHTSA-2005-20586). The scope of this workshop is strictly limited to issues surrounding implementation of OVSC Laboratory Test Procedure TP-138, including subsequent amendments, if any, resulting from the agency's response to petitions for reconsideration. TP-138 is posted on the NHTSA Web site at <http://www.nhtsa.dot.gov> (under "Test Procedures" on the Vehicles and Equipment page).

To enable interested parties and NHTSA personnel to discuss the questions concerning TP-138, NHTSA believes that it would be desirable to hold a technical workshop and demonstration on the test procedure. As noted above, persons wishing to participate in the workshop are requested to notify Lori Hamn by facsimile, mail or electronic mail no later than August 31, 2005. Prospective attendees should indicate their name, title, and organizational affiliation. Once the agency compiles a list of all prospective attendees, NHTSA will determine whether the number of participants per organization must be limited due to space constraints.

In order to facilitate discussions, the agency requests that interested parties submit written suggestions regarding topics pertaining to TP-138 for inclusion in the agenda for this workshop. Copies of all written submissions and the final agenda will be placed in the docket for this notice. The agency will include as many of the suggested topics in the final agenda as appropriate. The following is a preliminary agenda for the workshop.

Agenda

The workshop will begin at 8:30 a.m. on September 21, 2005 and conclude by 5 p.m. The agency has not decided if

physical demonstrations will be included. If physical demonstrations are conducted, sessions may extend into September 22, 2005.
