

Frequency of response: On occasion (when respondent writes to MPR requesting information from official military personnel files).

Estimated total annual burden hours: 167 hours.

Abstract: The information collection is prescribed by EO 12862 issued September 11, 1993, which requires Federal agencies to survey their customers concerning customer service. The general purpose of this data collection is to provide MPR management with an ongoing mechanism for monitoring customer satisfaction. In particular, the purpose of the National Personnel Records Center (NPRC) Survey of Customer Satisfaction is to (1) determine customer satisfaction with MPR's reference service process, (2) identify areas within the reference service process for improvement, and (3) provide MPR management with customer feedback on the effectiveness of BPR initiatives designed to improve customer service as they are implemented. In addition to supporting the BPR effort, the National Personnel Records Center (NPRC) Survey of Customer Satisfaction helps NARA in responding to performance planning and reporting requirements contained in the Government Performance and Results Act (GPRA).

2. *Title:* Presidential Libraries Museum Visitor Survey.

OMB number: 3095-0066.

Agency form number: N/A.

Type of review: Regular.

Affected public: Individuals who visit the museums at the Presidential libraries.

Estimated number of respondents: 75,000.

Estimated time per response: 15 minutes.

Frequency of response: On occasion (when an individual visits a Presidential Library).

Estimated total annual burden hours: 18,750 hours.

Abstract: The survey is comprised of a set of questions designed to allow for a statistical analysis that will ultimately provide actionable information to NARA. The survey includes questions that measure the visitor's satisfaction in general and with specific aspects of their visit. These questions serve as dependent variables for analytical purposes. Other questions provide attitudinal, behavioral, and demographic data that are used to help understand variation in the satisfaction variables. Using statistical analyses, Harris Interactive will determine the factors that drive the visitor's perceptions of quality and satisfaction with the Library they visited.

Additionally, natural groupings of visitors defined by similarity based on these attitudinal, behavioral, and demographic variables can be developed and targeted for outreach purposes. The information collected through this effort will inform program activity, operation, and oversight, and will benefit Library and NARA staff and management in making critical decisions about resources allocation, museum operation and program direction.

NUCLEAR REGULATORY COMMISSION

[NRC-2009-0138]

Proposed Generic Communication; Pre-Licensing Construction Activities at Proposed, Unlicensed Uranium Recovery Facilities

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed generic communication: Reopening of public comment period.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is reopening the comment period specific to the information collection aspects of a proposed regulatory issue summary (RIS) published on March 27, 2009 (74 FR 13483), which presents the NRC's interpretation of the regulations governing the commencement of construction found in 10 CFR 40.32(e). The comment period for this proposed RIS closed on April 27, 2009.

DATES: Comment period expires May 15, 2009. Comments submitted after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except for comments received on or before this date.

ADDRESSES: Submit written comments to the Chief, Uranium Recovery Licensing Branch, Division of Waste Management and Environmental Protection, Office of Federal and State Materials and Environmental Management Programs, U.S. Nuclear Regulatory Commission, Mail Stop T-8F5, Washington, DC 20555-0001, and cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to NRC Headquarters, 11545 Rockville Pike (Room T-8F5), Rockville, Maryland, between 7:30 a.m. and 4:15 p.m. on Federal workdays.

FOR FURTHER INFORMATION CONTACT: Mr. Stephen J. Cohen at 301-415-7182 or by e-mail at stephen.cohen@nrc.gov.

ADDRESSES: All holders of operating licenses for uranium recovery facilities and all companies that have submitted applications to construct new uranium recovery facilities of all types (conventional mills, heap leach, and in situ recovery (ISR) facilities) or letters of intent to submit such applications.

Intent

The U.S. Nuclear Regulatory Commission (NRC) is issuing this regulatory issue summary (RIS) to inform addressees of the NRC's policy regarding the permissible construction activities at proposed, unlicensed uranium recovery facilities. The NRC is issuing this RIS in response to industry inquiries regarding the activities that applicants may undertake prior to receiving a license.

SUPPLEMENTARY INFORMATION: In relation to the applications for new uranium recovery facilities currently under review and those applications expected over the next several years, the NRC has been queried by the uranium recovery industry about those construction activities that would be permissible at proposed uranium recovery facilities before a license is granted. The industry has requested information on permissible construction activities, including the potential use of limited work authorizations (LWAs) as provided in the reactor program, in the interest of minimizing the lead time from receipt of a license to the initiation of uranium recovery operations.

The NRC's regulations in 10 CFR 40.32(e) prohibits the commencement of construction of a uranium recovery facility until a license is issued. Moreover, commencement of construction prior to the issuance of a license would be grounds for denial of a license. "Commencement of construction" includes any clearing of land, excavation, or other substantial action that would adversely affect the environment of a site. However, the rule does permit site exploration, construction of roads necessary for site exploration, borings to determine foundation conditions, or other preconstruction monitoring or testing to establish background information related to the suitability of the site or the protection of environmental values. These activities may be conducted before a license is granted.

According to industry, ISR applicants, therefore, should be allowed to build out most of the facilities without a license, utilizing a tiered system of

activities. Tier 1 includes activities for which NRC would have no jurisdiction. Tier 2 activities would include those requiring NRC approval, but not a license. Tier 3 activities would not occur until a license is issued and would include construction of the evaporation ponds and actual operations.

Dated at Rockville, Maryland, this 29th day of April 2009.

For the Nuclear Regulatory Commission.

Keith I. McConnell,

Deputy Director, Decommissioning and Uranium Recovery Licensing Directorate, Division of Waste Management and Environmental Protection, Office of Federal and State Materials and Environmental Management Programs.

OFFICE OF PERSONNEL MANAGEMENT

Comment Request for Review of Information Collection: Agency Generic Survey Plan OMB #3206-0236

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, May 22, 1995), this notice announces that the Office of Personnel Management (OPM) intends to submit to the Office of Management and Budget a request for review of a revised information collection. The agency Generic Survey Plan is an umbrella for all OPM customer satisfaction surveys used to measure satisfaction with OPM programs and services. This Plan satisfies the requirements of Executive Order 12862 and the guidelines set forth in OMB's "Resource Manual for Customer Surveys".

The information collection was previously published in the **Federal Register** on March 14, 2008, at 73 FR 13925 allowing for a 60-day public comment period. No comments were received on this existing information collection. The purpose of this notice is to allow an additional 30 days for public comments. Comments are particularly invited on: Whether this information is necessary for the proper performance of functions of OPM, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate and based on valid assumptions and methodology; and ways in which we can minimize the burden of the collection of information on those who

are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

The collections will include web-based (electronic), paper-based, telephone and focus groups surveys. We estimate approximately 1,000,000 surveys will be completed annually. The time estimate varies from 3 minutes to 2 hours to complete with the average being 15 minutes. The annual estimated burden is 250,000 hours.

DATES: Comments on this proposal should be received within 30 calendar days from the date of this publication.

ADDRESSES: Send or deliver comments to: OPM Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, 725 17th Street, NW., Room 10236, Washington, DC 20503.

Please provide your mailing address or Fax number with your request.

Office of Personnel Management.

John Berry,

Director.
