

would be established as ORV areas and a number of routes would be designated. At Blue Creek, ORVs would only be allowed on sandy bottom areas designated routes, with ORV use prohibited on vegetated areas. ORV users would be required to obtain a free permit for educational purposes.

Alternative C: This alternative would manage ORV use through a fee permit system and user limits. Permits would include a fee, and initially there would be no limit on the number of permits. However, additional studies would be required to determine the appropriate use limit, and limits could be set in the future. ORV routes and areas would be designated, including one ORV area and designated routes at Rosita Flats and the sandy bottom area of Blue Creek.

Alternative D: The Preferred Alternative would manage ORV use through a zone system. Uses would be separated into the following zones: camping, hunting, resource protection, low speed, and beginner. At Rosita Flats, two areas would be established as ORV areas and a number of routes would be designated. At Blue Creek, ORVs would only be allowed on sandy bottom areas designated routes, with ORV use prohibited on vegetated areas. ORV permits would be required and a fee would apply. Permit fees would be used to recover costs associated with ORV management. New and current education and outreach efforts would also continue under alternative D. Alternative D would fully meet the plan objectives and has more certainty of success than the other alternatives analyzed.
