Title: Innovative Strategies for Increasing Self Sufficiency (ISIS)—Intervention Strategy Assessment Guide.
OMB No.: New Collection.

Description: The Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS), is proposing a data collection activity as part of the Innovative Strategies for Increasing Self-Sufficiency (ISIS) demonstration and evaluation. The ISIS project will test a range of promising strategies to promote employment, self-sufficiency, and reduce dependence on cash welfare. The ISIS project will evaluate multiple employment-focused strategies that build on previous approaches and are adapted to the current Federal, State, and local policy environment. The

major goals of the project include increasing the empirical knowledge about the effectiveness of a variety of programs for low-income families to sustain employment and advance to positions that enable self-sufficiency, as well as producing useful findings for both policymakers and program administrators.

This proposed information collection activity focuses on identifying promising strategies to be tested as part of the study. Through semi-structured discussions, respondents will be asked to comment on the most important strategies and interventions for potential evaluation.

Respondents: Semi-structured discussions will be held with administrators or staff of State agencies, local agencies, and programs with responsibility for employment-related services or activities for welfare and other low-income families; researchers in the field of welfare policy, poverty, economic self-sufficiency, and low-wage labor markets; and policymakers at various levels of government.

Title: Generic Clearance to Conduct Pre-Testing of Surveys.

OMB No.: New Collection.

Description: The Office of Planning, Research and Evaluation (OPRE), Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS), intends to request approval from the Office of Management and Budget (OMB) for a generic clearance that will allow OPRE to conduct a variety of data-gathering activities aimed at identifying questionnaire and procedural problems in survey administration. Over the next three years, OPRE anticipates

undertaking a variety of new surveys as part of research projects in the fields of cash welfare, employment and self-sufficiency, Head Start, child care, healthy marriage and responsible fatherhood, and child welfare, among others. In order to improve the development of its research and evaluation surveys, OPRE envisions using a variety of techniques including field tests, respondent debriefing questionnaires, cognitive interviews, and focus groups in order to identify questionnaire and procedural problems, suggest solutions, and measure the relative effectiveness of alternative survey solutions.

Following standard OMB requirements, OPRE will submit a change request to OMB individually for every data collection activity undertaken under this generic clearance. OPRE will provide OMB with a copy of the individual instrument or questionnaire, as well as other materials describing the project and specific survey pre test.

Respondents: The respondents will be identified at the time that each change request is submitted to OMB. Generally, they will be individuals who are

representative of the target groups for

the public assistance research or evaluation project in question.
