SUPPLEMENTARY INFORMATION:

I. Abstract

The Special Census Program is a reimbursable service offered and performed by the Census Bureau for the government of any state; county, city, or other political subdivision within a state; for the government of the District of Columbia; and for the government of any possession or area over which the U.S. exercises jurisdiction, control, or sovereignty, and other governmental units which require current population data between decennial censuses. The Special Census Program will be closing down for this decade in 2009 and will startup again after the 2010 Decennial Census. We are requesting an extension of the expiration date of the Special Census Program through June 2009, at which time, the program will close down and will be unavailable until after the 2010 Decennial Census.

Many states distribute funds based on current population statistics. In addition, special census data are used by the local jurisdictions to plan new schools, transportation systems, housing programs, and water treatment facilities.

The Census Bureau will use the following forms to update addresses listed on the Census Bureau's Master Address File (MAF) and to enumerate populations in special censuses:

SC-1, Special Census Enumerator Questionnaire—This interview form will be used to collect special census data at regular housing units (HU).

SC-1 (SUPP), Continuation Form for Enumerator Questionnaire—This interview form will be used to collect special census data at a regular HU when there are more than five members in a household.

SC-1 (Telephone), Special Census Enumeration Questionnaire—This interview form will be used to collect special census data when a respondent calls the local special census office.

SC-2, Special Census Special Place Questionnaire—This interview form will be used to collect special census data at group quarters (GQ) in special places (SP) such as hospitals, prisons, boarding and rooming houses, campgrounds, hotels, college dormitories, military facilities, and convents.

SC-116, Group Quarters Enumeration Control Sheet—This page will be used

by Special Census enumerators to list residents/clients at GQs.

SC-351, Group Quarters Initial Contact Checklist—This checklist will be used by enumerators to collect contact information and to determine the type of GQ.

SC-920, Address Listing Page—This page will include existing addresses from the MAF. Special Census enumerators will update these addresses, if needed, at the time of enumeration.

SC-921(HU), Housing Unit Add Page—This page will be used by enumerators to add HUs that are observed to exist on the ground and that are not contained on the address listing page.

SC-921(SP), Special Place/Group Quarter Add Page—This page will be used by enumerators to add SPs/GQs that are observed to exist on the ground and that are not reflected in the address listing page.

The Special Census Program will operate as a generic OMB clearance including a library of forms and the operational procedures that will be used for the remaining special censuses we anticipate conducting this decade. The Census Bureau will establish a reimbursable agreement with a variety of potential special census customers that are unknown at this time.

Census will submit for OMB's review and approval, using a change worksheet, any special-purpose questions requested by customers to be added to special census questionnaires.

II. Method of Collection

The Special Census Program will use the Census 2000 Update/Enumerate (U/E) methodology. Enumerators will canvass their assigned areas with an address register that contains addresses obtained from the MAF. Special Census enumerators will update the address information, as needed, based on their observation of HUs and/or SPs/GQs that exist on the ground. Additionally, enumerators will interview households at regular HUs and residents at GQs using the appropriate Special Census questionnaire.

Uncovered Innerspring Units From the People's Republic of China, South Africa, and the Socialist Republic of Vietnam: Initiation of Antidumping Duty Investigations

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: January 28, 2008.

FOR FURTHER INFORMATION CONTACT: Erin Begnal at (202) 482-1442 or Scot Fullerton at (202) 482-1386 (People's Republic of China), AD/CVD Operations, Office 9; Dmitry Vladimirov at (202) 482-0665 or Minoo Hatten at (202) 482-1690 (South Africa), AD/CVD Operations, Office 5; Eugene Degnan at (202) 482-0414 or Robert Bolling at (202) 482-3434 (Socialist Republic of Vietnam), AD/CVD Operations, Office 8, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

The Petitions

On December 31, 2007, the Department of Commerce (the Department) received petitions concerning imports of uncovered innerspring units from the People's Republic of China (the PRC), South Africa, and the Socialist Republic of Vietnam (Vietnam) (collectively, the Petitions) filed in proper form by Leggett and Platt, Incorporated (the petitioner). See Petitions on Uncovered Innerspring Units from China, South Africa, and Vietnam (December 31, 2007). On January 7, 2008, the Department issued a request for additional information and clarification of certain areas in the Petitions. Based on the Department's requests, the petitioner filed additional information on January 11, 2008 (four distinct submissions on general issues, PRC-specific material (PRC Supplement to the Petition), Vietnam-specific material (Vietnam Supplement to the Petition), and South Africa-specific material (South Africa Supplement to the Petition)), and on January 16, 2008 (two distinct submissions on PRC-specific material (PRC Second Supplement to the Petition) and Vietnam-specific material (Vietnam Second Supplement to the Petition)).

In accordance with section 732(b) of the Tariff Act of 1930, as amended (the

Act), the petitioner alleges that imports of uncovered innerspring units from the PRC, South Africa, and Vietnam are being, or are likely to be, sold in the United States at less than fair value, within the meaning of section 731 of the Act, and that such imports are materially injuring, or threatening material injury to, an industry in the United States.

The Department finds that the petitioner filed these Petitions on behalf of the domestic industry because the petitioner is an interested party as defined in section 771(9)(C) of the Act and has demonstrated sufficient industry support with respect to the initiation of the antidumping duty investigations that the petitioner is requesting. See the "Determination of Industry Support for the Petitions" section below.

Period of Investigation

Because the Petitions were filed on December 31, 2007, the anticipated period of investigation (POI) for the PRC and Vietnam is April 1, 2007, through September 30, 2007. The anticipated POI for South Africa is October 1, 2006, through September 30, 2007. See 19 CFR 351.204(b)(1).

Scope of Investigations

The merchandise covered by each of these investigations is uncovered innerspring units composed of a series of individual metal springs joined together in sizes corresponding to the sizes of adult mattresses (e.g., twin, twin long, full, full long, queen, California king, and king) and units used in smaller constructions, such as crib and youth mattresses. All uncovered innerspring units are included in this scope regardless of width and length. Included within this definition are innersprings typically ranging from 30.5 inches to 76 inches in width and 68 inches to 84 inches in length. Innersprings for crib mattresses typically range from 25 inches to 27 inches in width and 50 inches to 52 inches in length.

Uncovered innerspring units are suitable for use as the innerspring component in the manufacture of innerspring mattresses, including mattresses that incorporate a foam encasement around the innerspring.

Pocketed and non-pocketed innerspring units are included in this definition. Non-pocketed innersprings are typically joined together with helical wire and border rods. Non-pocketed innersprings are included in this definition regardless of whether they have border rods attached to the perimeter of the innerspring. Pocketed
