

patent license will be for the purpose of consolidating the patent rights to ULRF, one of the co-owners of said rights, for commercial development and marketing. Consolidation of these co-owned rights is intended to expedite development of the inventions, consistent with the goals of the Bayh-Dole Act codified as 35 U.S.C. 200–212.

The prospective patent license will be worldwide, exclusive, and may be limited to those fields of use commensurate in scope with the patent rights. It will be sublicensable, and any sublicenses granted by ULRF will be subject to the provisions of 37 CFR part 401 and 404.

Griffithsin (GRFT) is a protein that was originally isolated from marine red algae, namely Rhodophyte (*Griffithsia* sp.). It binds the terminal mannose residues of N-linked glycans found on the surface of many enveloped viruses such as HIV, SARS-CoV, Ebola virus, and more. The E-029-2022 invention pertains to novel mutant Griffithsin (GRFT) formulations and methods of inhibition of viral infection. The E-030-2022 invention pertains to methods of systemically treating viral infections and additional mutant GRFT variants that are specifically mutated to introduce a lysine within a mutant GRFT sequence. These GRFT variants can be PEGylated, which significantly improves pharmacokinetics and decreases immunogenicity. Based on current available data, the intended use for the inventions is as anti-viral therapies for enveloped virus infections.

This notice is made pursuant to 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive patent license will include terms for the sharing of royalty income with NCI from commercial sublicenses of the patent rights and may be granted unless within fifteen (15) days from the date of this published notice the NCI receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

Complete applications for a license that are timely filed in response to this notice will be treated as objections to the grant of the contemplated exclusive patent license. In response to this Notice, the public may file comments or objections. Comments and objections, other than those in the form of a license application, will not be treated confidentially, and may be made publicly available.

License applications submitted in response to this Notice will be presumed to contain business confidential information and any release

of information from these license applications will be made only as required and upon a request under the *Freedom of Information Act*, 5 U.S.C. 552.

Dated: December 21, 2021.
