SUPPLEMENTARY INFORMATION: The Adak January 11, 2010 oil spill involved releases of up to 142,000 gallons of diesel fuel from the Adak Petroleum Bulk Fuel facility into Helmet Creek and related waterways. Diesel contamination was observed in streams and wetlands that provide habitat for pink salmon, Dolly Verden, juvenile fish, and marine birds. The Trustees assessed natural resource injuries and resource services losses in the spill area, while outlining potential restoration alternatives and considering the direct, indirect, and cumulative impacts of these alternatives on the human environment. The Trustees are working with Adak Petroleum to resolve its liability through the restoration and rehabilitation of natural resources injured by the oil discharge.

Proposed Restoration: The Draft DARP/EA identifies the restoration projects that the Trustees propose to restore resources and services to compensate the public for assessed losses. The Trustees' restoration objectives are: (1) Improve Helmet Creek, restore juvenile and adult fish passage, (2) Improve water quality, and (3) Allow for improved habitat for salmonid species. The Trustees considered various alternative projects to address these restoration goals, which are outlined in this DARP/EA. However, after reviewing these alternatives, the Trustees agreed that the proposed restoration alternative best met their objectives. The proposed preferred alternative includes the following projects:

- (1) Remove two trash racks from culverts in Helmet Creek.
- (2) Restore grade of creek for fish passage.
- (3) Improve low flow passage inside the Creek's culvert and above the tank farm.
- (4) Remove debris from the creek and floodplain.
- (5) Revegetate banks to minimize disturbance and provide bank stability.

Adak Petroleum, as the Responsible Party for this spill, will be funding and implementing restoration at the Helmet Creek site, under Trustee supervision. This restoration work will be undertaken in accordance with the terms of a Consent Decree that will resolve the liability of the Responsible

Party for natural resource damages under OPA and State law.
