FOR FURTHER INFORMATION CONTACT:

Steve Fischer, OPS, (202) 366-6267 or Richard Huriaux, OPS, (202) 366-4565, regarding the subject matter of this notice. Additional information about the NPMS and the "National Pipeline Mapping System Standards for Pipeline and Liquefied Natural Gas Operator Submissions" can be found at <http://www.npms.rspa.dot.gov>.

SUPPLEMENTARY INFORMATION: NPMS is a geographic information system database that contains the locations and selected attributes of hazardous liquid and natural gas transmission pipelines, breakout tanks, and liquefied natural gas. The data collected for the NPMS is necessary for regulatory oversight and for monitoring the security of the pipelines. The Pipeline Safety Improvement Act of 2003 required operators to submit data to the NPMS by June 17, 2003. This initial submission is being done in accordance with guidance previously developed for voluntary data submissions to the NPMS.

RSPA/OPS is holding this public meeting to solicit public comments on the potential for improving NPMS data submissions and the potential for collecting certain annual report data elements as submissions to the NPMS.

Improvements being considered include more detailed pipeline attributes, more accurate pipeline locational data, and the identification of natural gas transmission pipeline high consequence areas. The additional data requirements for these improvements may include diameter, maximum operating pressure for hazardous liquid pipelines, and maximum allowable operating pressure for natural gas transmission pipelines.

The current NPMS target locational accuracy goal is ± 500 feet for submitted geospatial data. RSPA/OPS will be soliciting feedback at the meeting regarding the effort required by the pipeline industry to better this target locational accuracy. To date, 15% of the NPMS mileage submitted has an accuracy of ± 50 feet, 46% has an accuracy of ± 50 to 300 feet, 28% has an accuracy of ± 301 to 500 feet, and 11% is either ± 500 feet or unknown.

RSPA/OPS has identified NPMS data requirements that could support RSPA/OPS and State oversight of gas integrity management programs. At the meeting, RSPA/OPS will focus on how natural gas transmission operators delineate high-consequence areas and how that data could be submitted to the NPMS.

Much of the data collected through RSPA/OPS annual reports lends itself to geospatial representation and could be submitted to RSPA/OPS through the NPMS. The meeting will address allowing pipeline operators the option of submitting certain annual report data elements as an NPMS submission in the future.
